

LOUISVILLE SUSTAINABILITY

LOOKING AHEAD

IN PARTNERSHIP WITH XCEL ENERGY,

Developing concrete emissions reduction and renewable integration goals sets a clear commitment and provides a point of reference against which the City and community can measure its progress towards a sustainable future.

GOAL SETTING

GAP PLANNING

How do we close the gap and accomplish these goals? The city and its regional partners will evaluate various strategies to reach our municipal and community-wide goals, stressing feasibility, cost-effectiveness and impact.

Community engagement and support is critical to the success of sustainability goals. Events, programs and other platforms will be utilized to educate and engage Louisville residents and businesses.

ENGAGEMENT

IMPLEMENTATION

Through identified strategies and ongoing partnership, City staff will begin the extensive process of implementation. Annual progress reporting will be made public and dispersed through City channels.
