Subject: Question on agenda item 5.F. "Sell Real Estate at 1501 Empire Road and the easterly portion of 1303 Empire Road."
Date: Friday, August 28, 2026 4:27:49 PM

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Dear City Council Members and City Manager Langley,

Thanks for your work for our community.

I have questions about agenda item 5.F. "Sell Real Estate at 1501 Empire Road and the easterly portion of 1303 Empire Road."

According to our new comprehensive plan this area is designated "Public Use". What is the procedure for changing a Land Use designation that is shown in our newly adopted comprehensive plan? How will the new land use designation be determined?

I see that the city plans to sell the land to Ripple Creek Properties, LLC, 1127 Sherman St, Denver. Has the city discussed the future land use designation with the purchaser? According to the staff packet, "City Council will need to approve an ordinance authorizing the conveyance of the property, which will be presented to Council after the property has been subdivided and a new legal description has been created." Can you provide any more information about the subdivision process? Will the city bring a subdivision proposal to City Council or Ripple Creek Properties?

I see that the December 2025 appraisal was \$2.9M and that the purchase price is currently shown to be \$3.5M. That sounds like a good deal for the city, but if the purchase is based on one zoning and the city is selling as a different zoning, would it make sense for the property be re-appraised?

Is there an option to keep this property as open space when the lease to Avid is over? This is part of the rural buffer between Louisville and Lafayette. Alternatively, will the city consider using the sale money for purchase of open space property adjacent to Davidsion Mesa? Or has this money already been considered in the City Budget? I apologize if I have too many questions to understand if this is a reasonable suggestion.

Looking forward to hearing back from staff or learning the answers to these questions at your meeting Tuesday,

Thanks,

Tamar Krantz

Open Monday, September 7 (Labor Day)
Closed Tuesday, September 8 (driving range open)

[Book A Tee Time](#)

Fall Aerification

CLOSED: Tuesday, September 8 (driving range open)
FRONT NINE ONLY: Wednesday, September 9

It's time to give our greens a little fall TLC. Coal Creek Golf Course will be closed Tuesday, September 8, for fall aerification using the DryJect process. The front nine will reopen Wednesday, September 9, while work continues on the back nine.

Aerification is essential for healthy greens. It relieves soil compaction and helps air, water, and nutrients reach the roots, creating stronger turf and better playing conditions over time.

The good news? DryJect creates small channels in the greens and fills them with sand without pulling traditional cores. That means less disruption to the putting surface and greens that repair more quickly than with traditional core aerification.

We appreciate your patience while our maintenance team gives the greens the care they need for a healthy fall and a strong start next spring.

Pond Update

Work is underway to replace the liner in the greenside pond on Hole 2. The project will address the aging pond liner and help ensure the pond continues to function as an important part of the course.

Golfers may notice construction activity near Hole 2 throughout the fall, with the most active work expected in October and November. The project is anticipated to continue through early December.

We'll work to minimize impacts to play as much as possible and appreciate your patience while we make this important improvement to the course.

You may have also noticed recent activity at the pond near Hole 10. Following routine pond treatment during a period of hot weather and low water levels, low-oxygen conditions affected some of the fish in the pond. Our team has been working with our pond management contractor to care for the pond and reduce the potential for similar impacts in the future.

Upcoming Events:

OP 36 Fall Session

Fall session runs September 15-October 20

New to golf? Operation 36 is designed for beginning golfers ages 7+. Learn golf the way it's meant to be learned, combining coaching, practice, and on-course challenges to build skills and confidence. [Sign up for OP36 >](#)

September Sale

- 20% off all men's and women's apparel and shoes
- 25% off all golf bags
- 25% off Odyssey, Taylor Made, Mizuno, and Cleveland putters

Hungry?

Fuel up before your round or grab a bite after the 18th. Stop by The Turn and try our burger. We think it's the best in town, but you can be the judge. And if you're teeing off early, here's something worth knowing: our breakfast burritos have tater tots in them. Enough said.

Check out the menu and make The Turn part of your next round.

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Dear City Council Members,

I want to forward my further concerns regarding the library cuts and specifically reductions to the Story Time, which is the only means for families with small children to engage in the community (again, there are no other appropriate programs at the rec center, through concerts, etc.).

I also want to attach a picture of my daughter to have a face to who is being affected. I notice that many of you are older and may not have family members with disabilities so it can be hard to empathize and connect with these decisions. It must cost very little money to have a story time so it is shocking that these cuts are being made.

Sincerely,
Lisa Winter-Baek

Cc: "jason.baek@gmail.com" <jason.baek@gmail.com>

Dear Brandi,

Thank you for the thoughtful email in response to my concerns. We have really felt that the Library has given Ruby and ourselves a sense of community. We have met people there that we then see throughout town and strike up conversations with. We started having play dates with some of the other library story time friends. It has been a true gem for Louisville!

A couple of things I'd like to point out:

The Baby Storytime has a social play time afterwards which has been extremely helpful for talking with others in the community and creating bonds. That model has been very successful for us! Also, having a play area in the Children's section and a fish tank allows people to linger and not just run out to the next thing. These spaces are so important!

We heard from story time staff that folks are leaving because they feel their jobs are unstable. This is definitely sad to hear. It's good to hear new staff will be added, but if it takes months that is a huge blow to the little ones because they developmentally

change so fast. They truly miss out on forming connections. Before long it will be cold and flu season and holidays and many families will not be able to attend for months (like us due to high risk of illness for a medically complex child). The multiple times are also great because baby and toddler nap times are so unpredictable. If we miss one, we try to go to the next one. It's so hard to plan with young kids!! I would also point out again there is no other opportunity for families with young kids to engage with meaningfully.

Another concern is the loss of the programming for the less crowded times. Last week we went to a small size toddler story time (4 kids + adults), the smallest one I've been to. I was amazed to see our baby, who usually quietly sits and takes everything in, to be extremely talkative. It was the first time she tried to imitate the motions in a song and she called out an animal noise during one of the stories. She is 11 months old and has never done this before! She doesn't have the confidence to speak up like that in the big classes and is a bit nervous. For neurodivergent kids like her, the big classes can be overstimulating and I was so thankful to see this development for her (many kids with Down's syndrome do not say their first word until 2-3 but she is already saying many words... these story times are part of what is helping her so much!). This is so important for being inclusive and the return is so great for the whole community. Even for neurotypical kids, I've heard parents say they don't go to the Boulder story times because they are cramped and crowded. The Louisville ones have been the nicest around the county.

I would be happy to set up a time to talk either by phone or in person. If your office is in the library, I could stop by after a story time even!

Lisa Winter-Baek

On Aug 25, 2026, at 5:10 PM, Brandi Cummings
<bcummings@louisvilleco.gov> wrote:

Dear Lisa and Jason,

My name is Brandi Cummings, and I serve as the Director of Cultural Services for the City of Louisville. As part of that role, I have the honor of overseeing the Louisville Public Library. Your email to City Council was shared with me, and I wanted to reach out personally to thank you for taking the time to share your family's experience and to provide a little additional context about the changes you've noticed at the Library.

It means a great deal to hear that the Library—and especially storytime—has become a place where your daughter and your family have found friendship, connection, and a sense of community. Creating spaces where children and caregivers feel welcomed,

supported, and included is at the heart of what we hope to provide. Hearing what that has meant for your family is incredibly meaningful to us.

I also want to offer some reassurance and clarification. Storytimes have not been cut, and no programs have been eliminated. We have temporarily restructured our storytime schedule—combining some sessions with larger audience limits and shifting the times of others—to align with our current staffing capacity while we work through the hiring process for several open positions.

We are fortunate to have had wonderful staff members who have recently moved on to opportunities that allow them to continue growing in their careers. We are excited for them and the opportunities ahead, while also recognizing how much they are already missed by our staff and by families like yours. During this transition, there will be some temporary impacts to our service schedule, but we look forward to expanding our capacity again as positions are filled and new team members are trained.

More broadly, we know how important the Library is as a gathering place for families, particularly for young children and their caregivers. As we continue to be responsible stewards of the Library's budget, rising costs for resources and services may require us to make thoughtful adjustments over time. Our goal is to make those decisions carefully and to focus our resources where they can have the greatest positive impact for our community.

That is also why the feedback we are gathering through the Cultural Services Strategic Plan survey is so valuable. It will help us better understand what our community values most and ensure that our programs, services, and resources continue to align with the needs and priorities of Louisville residents.

Thank you again for writing and, especially, for sharing what the Library has meant to your daughter and your family. Stories like yours are an important reminder that storytime is about much more than books and songs—it is also about belonging, connection, and creating community. We are grateful that your family has found that sense of community at the Library, and we want it to continue.

I would also be very happy to meet with you personally if you would

like to talk more about the Library, the temporary changes you are seeing, or any other questions or concerns you may have. Please feel free to reach out to me directly, and we can find a time that works for you.

Warmly,

Brandi Cummings *(she/her)*

Good afternoon!

I wanted to give everyone a quick update following yesterday's Board of Education meeting. As you may have heard by now, we presented our Resilient Schools proposal to the Board of Education. The plan aims to make BVSD schools more resilient during this time of declining enrollment, guided by last Spring's community feedback.

The proposal includes school consolidations, closures, grade reconfigurations and relocations.

Quick Overview - By the numbers

Schools impacted: 16

Closed buildings: 4

Closed schools: 6

See the superintendent's letter below for the details.

Resilient Schools Proposal

Dear BVSD Families and Staff,

This afternoon we met with the BVSD Board of Education and presented our plan to make our schools more resilient during this time of declining enrollment.

Before I share the specifics, I want to once again recognize that this is an incredibly difficult moment, especially for the schools that will be impacted.

Before considering options, we heard from our community. Last Spring, we engaged our elementary school leaders, educators, families and residents – knowing that their values, priorities and perspectives were key to our decision making. We heard clearly that our community values smaller class sizes, having fewer multi-grade classes, and having more time for dedicated educators and other professionals, beyond classroom teachers, to provide targeted learning or social emotional support or expand access to art, music and physical education.

With that in mind, this summer, the BVSD leadership team worked to evaluate options, including school closures, consolidations, reconfigurations and relocations. Analyzing enrollment trends, building capacity, facility conditions

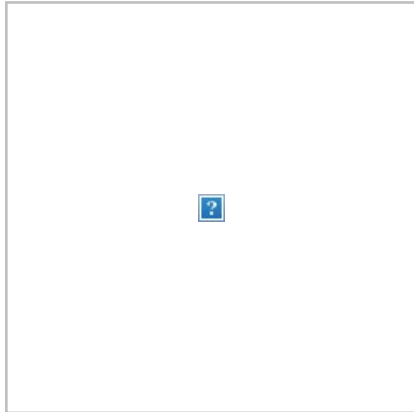

and long-term students needs, they weighed the potential challenges and possibilities.

Today, our team presented the following recommendations to the Board of Education.

If approved by the Board of Education on September 22, these changes would take effect beginning with the 2027-28 school year.

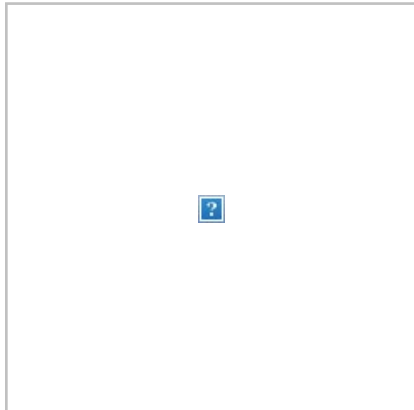

Families and staff at schools who are named in the recommendations below will receive additional communication shortly explaining the rationale for each one, as well as the measures we will take to support students, staff, and families.

BOULDER

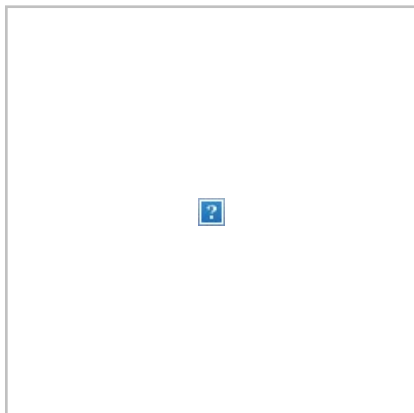

SCHOOL CONSOLIDATION

Close Mesa Elementary and merge the school communities in the Bear Creek building

SCHOOL CLOSURE

Close Douglass Elementary School and divide its attendance area among Coal Creek, Eisenhower and Heatherwood

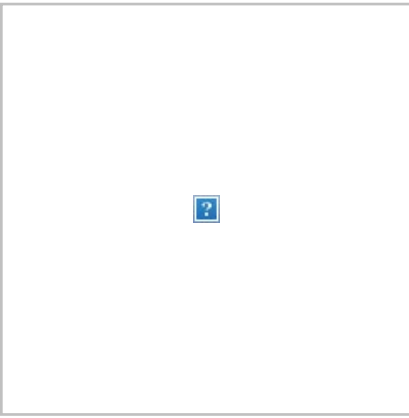

SCHOOL RELOCATION

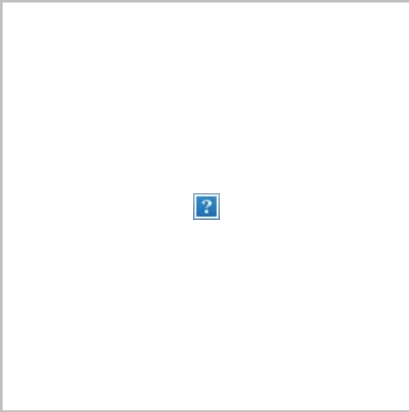

Move High Peaks Elementary to the former Douglass Elementary campus

SCHOOL RELOCATION

Close the Community Montessori building. Move Community Montessori to the former High Peaks Elementary space on the Aurora 7 campus, co-locating with the Boulder Community School of

Integrated Studies (BCSIS)

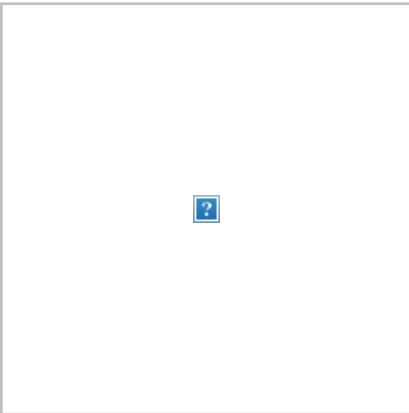

SCHOOL CLOSURE

Close Flatirons Elementary and divide its attendance area between Whittier and Foothill elementary schools

BROOMFIELD

SCHOOL CONSOLIDATION

Close Birch Elementary and merge the school communities in the Kohl building

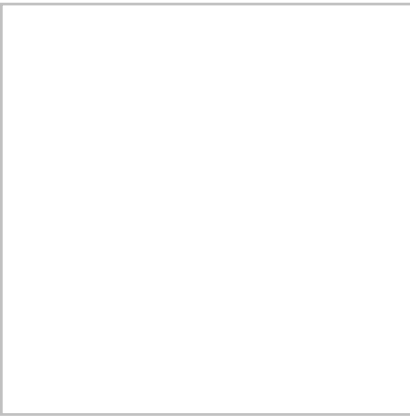

LOUISVILLE/SUPERIOR

GRADE RECONFIGURATION

Eldorado PK-8 becomes an elementary school and Monarch PK-8 becomes a middle school.

Divide the Monarch PK-5 attendance area among Fireside, Superior and Eldorado elementary schools. Combine the Eldorado 6-8 and Monarch 6-8 attendance areas.

Learn more on the Resilient Schools webpage

Watch a video below outlining the changes:

DUAL LANGUAGE SCHOOLS

During the process of reviewing our schools, the team identified some opportunities for improvement with our dual language programs in both Boulder and Lafayette. The team also recognized that we need more information before we proceed with a recommendation.

Therefore, the team's proposed next steps are to take this next year to engage in a thorough review process of BVSD's PK-5 and 6-8 dual language models in both Boulder and Lafayette. The review will include an internal analysis of programming, a systematic review of national research, and opportunities for teachers, families, and students to provide feedback.

The team will return to the Board at a yet to be determined time to provide an update and recommendations, which could include program and/or facility changes. Dual language programming remains a district priority.

NEXT STEPS

The Board of Education will be carefully considering the recommendations and hearing from the community during its meetings on Sept. 8 and 22. [BVSD families, staff and residents may sign up for Public Comment on the Board of Education's website.](#)

Again, we take the actions presented in this proposal very seriously and know that any changes to our schools, especially those that involve closure will be difficult for our community and especially for those involved.

[Our Resilient Schools website has additional information about the plan, an FAQ and resources for impacted families and staff.](#)

Sincerely,

Dr. Rob Anderson

Subject: Disappointment over cuts to the Library
Date: Tuesday, August 25, 2026 3:05:12 PM

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Dear Louisville City Council Members,

We are very disappointed to hear that there have been cuts to the Louisville Library. We have an almost one year old baby girl with Down syndrome and the library has been our community since she has gotten off a feeding tube and oxygen and was allowed to be around others safely. We attend Story time and have already made a lot of friends for my daughter, which has made her feel a part of this community. There are no other community resources for her as a young child with a disability. The rec center has only one baby class (a swimming class which we did take but was for older kids who were more abled). We found out today that the story time we attended today was being cut and that one of her favorite library aides (Leah) was also cut. She was so kind and taught our daughter sign language and sang so lovely to all the children. She is already missed immensely. It is really important to have support for the Library for younger residents of the town and their caregivers. This summer has been hot and the library was the only meaningful place to gather and connect with other families. Already over the summer there had been cuts and only two story times a week when the previous months had sometimes two per day.

If you would like to hear more about this impact on families like our own, I'd be happy to give more details.

Your neighbors,
Lisa Winter-Baek and Jason Baek

[image.png](#)

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Dear Mayor Leh and Members of City Council:

As you shape the PROS Guidebook Long Range Plan, please consider the following:

1. The overall feel of this draft is that Open Space exists to provide for human recreation. While I agree that human recreation is the over-riding purpose of the golf course, I think the Open Space is so much more. The North American prairie itself is an endangered ecosystem, deserving of protection in its own right. Our grasslands help us meet our carbon goals. "While forests are often seen as the best natural carbon sink, prairies and grasslands store carbon more reliably over the long term, primarily in their deep root systems and the surrounding soil." <https://naturalcommunities.net/blogs/news/carbon-sequestration-in-native-grasslands-how-restorations-can-fight-climate-change> Two things that will impact how much wildlife exists on our lands in the next 20 years are how fragmented the landscape becomes and how well the habitat is connected. As the bio-blitz shows, our Open Spaces have rare and unique plants and animals. The decisions made now determine the legacy we leave. Rather than focusing on "balanc[ing] recreational access with habitat protection," it would be better to focus on protecting and restoring our Open Space.
2. The centrality of water to life does not come through. Our riparian zones and other water dependent ecosystems are now thought to support 90% of our wildlife. As explained in LOSA's letter the Dutch Creek Riparian corridor is not adequately protected. More of this corridor needs protection through the Preserve Classification, a 120 foot buffer, and closure of undesignated trails.
3. Figure 10's statement that for Preserve Lands of high ecological importance "LOW habitat fragmentation is permitted" is incorrect. This is a case where over-simplification of the City Charter could lead to real harm. In Preserve Lands, the City Charter mandates that "This land **shall be** managed in a manner that preserves and promotes the long-term viability of native plants and native wildlife, restoration, restoration potential, and ecologically sound agricultural use." Section 15-4(b)(1)(B). Therefore, fragmentation is only permissible when it preserves and promotes the long-term viability of native plants and native wildlife, restoration, restoration potential, and ecologically sound agricultural use. Also, Figure 10 is ignoring that "No or very low levels of passive recreational activities shall be permitted."

Figure 10. Open Space Classifications Diagram

- The challenges and opportunities section does not reflect an environmental vision by which I mean there is no mention of the fact that prairie ecosystems themselves are endangered, the extraordinary ecological value of riparian corridors and other water dependent ecosystems, the need to preserve existing intact fragments, and the importance of preventing fragmentation of large tracts of land and promoting connectivity to protect endangered species and to prevent more species from becoming endangered.

Open Space Engagement Takeaways

CHALLENGES	OPPORTUNITIES
✗ Diverse perspectives on land management and land uses	✓ Use science-based stewardship (e.g. grazing, mechanical treatments, etc.).
✗ Additional mapping and inventories needed	✓ Complete baseline ecological inventories and annual monitoring.
✗ Limited policies for undesignated (social) trails	✓ Employ ecological buffers and standards for social trails
✗ Opportunities to increase education and awareness	✓ Ensure equitable engagement via Spanish-language materials, childcare, etc.
✗ Need for permanent, dedicated funding sources	✓ Make open space funding permanent; leverage grants/partnerships.

- Add references to the City Charter where the draft PROS Plan is only referencing City Ordinances as the policy in the ordinances flows from the Charter. If the PROS Plan is only going to reference one source of authority then it should reference the primary source of authority, the City Charter.
- I agree with other comments submitted that: [1] with only 6% of the land designated as Preserve, the land classification system needs significant adjustment for the stated reasons; and that [2] the environmentally damaging trail 18 on Page 54 of the Trails Guidebook should be removed for the stated reasons.

Thanks for reading through my comment letter.
Best,

Cathern Smith

Mayor Leh and council members,

Thank you for the opportunity to comment on the PROS and Trails Guidebooks. I appreciate all the work of staff and consultants on the two guidebooks.

Truly balance environmental protection and recreation, not prioritize recreation as is the case now. Despite the repeated “balance” wildlife/environment and recreation statements in both guidebooks, open space is heavily weighted towards recreation to the detriment the wildlife and protection. A prime example of this is the reclassification of the land classifications. When established the assumption was that the four classification categories would be equally distributed, around 25% each. (I made the suggestion of the four roughly equivalent categories and their description to help break an impasse between city council and successful initiative petitioners to establish the Louisville Open Space Advisory Board, thus avoiding a public vote.) The new classification in the PROS Guidebook is Preserve 6%, Protected Lands 30%, Visitor Lands 40%, Other Lands 19%. To provide balance use common and accepted recreation ecology protection practices and the new vegetation mapping to balance preserve and protect and recreational and other at about 50%, with preserve and protection at about 25% each.

An example of the needed land classification correction is in the Dutch Creek area near Coal Creek Trail. In this area open space “Preserve” was inexplicably applied to only part of the “Eastern Cottonwood...Floodplain Woodland” vegetation association thereby not protecting all the riparian area that is in that vegetarian type. (See 2026 Louisville Vegetation Survey map for the Dutch Creek area, not paginated, compared to Trail Guidebook page 23). As an accepted practice, all the riparian area and a 120-foot buffer, should also be placed in the Preservation classification as the initial open space inventory recommended in 2003. All this area definitely meets the Preserve Charter Criteria of “characterized by a moderate to high level of relative ecological importance.” For Preserve lands the Charter directs that “sufficient buffer area to permit the successful management of the open space—preserve land” for just this situation. In this sensitive riparian area and buffer there are numerous environmental and wildlife damaging undesignated trails that should be closed and restored, similar to Hecla Lake

Remove the environmentally damaging trail 18 from Page 54 of the Trails Guidebook. The trail description is: “Establish a new, off street connection between Campus Drive extension (Red Tail Ridge) and the Coal Creek Regional Trail”. During the Louisville Comprehensive Plan council, following discussion about the problems with the trail, directed staff to change the text to “potential new trail linking”. The trail alignment delineated along the Goodhue Ditch damages the adjacent riparian area, fragments area habitat, undermines agricultural operations and is either has a very

dangerous Dillon Road at-grade crossing or an really expensive and environmentally damaging underpass. If the city is serious about protecting the environment and wildlife in sensitive and important areas, this trail alignment should be removed from the guidebook map. Please remember the current balance is already heavily weighted to recreation to the detriment of environmental protection. If a connection must be made, a better solution is to provide a trail along 96th Street and use the stoplight for a pedestrian crossing.

Thank you for reading and considering these comments.

Sincerely, Matt Jones, Louisville

To City Council and Diana Langley,

Please provide an update as to what is happening on Hole 10 of the Coal Creek Golf Course.

My understanding is that there is some algae clean-up using chemicals in the Hole 10 pond. I live directly across the street from Hole 10.

The smell was so bad this morning that I shut all my windows as soon as I got up. Very obvious something is not right. My neighbor, who's yard backs up to Hole 10, said he had a friend over Saturday and the smell was so bad he had to leave as it was affecting his breathing. And that was Saturday, and we have not been told anything.

We all should be concerned for the health and safety of everyone in the area (households around the course, golfers, and maintenance crew). Attached is a photo I took this morning of Hole 10 from the public sidewalk. As you can see, there is maintenance work being done at the pond, with a small cart/vehicle on the right of the pond close to the fairway. There are golfers playing 'around' the work being done. A worker could easily be hit by a golf ball coming off a tee box - and it wouldn't even be an 'errant' ball since the vehicle is on the rough/fairway in 'legitimate' territory.

1. There is no ranger in the area explaining to the golfers about the work being done. And there is no instruction to golfers prior to approaching that hole. The golfers just walk/ride up and hit. I talked to a foursome of ladies heading to their tee box who said they received no instruction/information about what was going on there. So they'll just drive up to their tee box and hit away.
2. I would think the course should also be alerting people because some may have breathing/air sensitivity issues around these conditions.

Again, please communicate asap - to the entire Louisville community - what is going on.

Respectfully submitted,

Gerri Foley

922 St Andrews Lane Louisville

Subject: PROS Planning - Establishing Clear Priorities, Charter Alignment, and Ecological Protection in the PROS Guidebook and Trail System Plan
Date: Tuesday, August 25, 2026 11:26:07 AM

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Dear Mayor Leh and Members of City Council,

On behalf of Louisville Open Space Advocates (LOSA), we want to thank staff, consultants, and our advisory boards for the tremendous care and effort invested in the Draft Trail System Plan and PROS Guidebook. City Council has a unique and powerful opportunity with these master plans to shape the long-term vision of our community. As the ultimate policy-making body, Council is uniquely positioned to set clear, forward-looking priorities that honor the spirit of the City Charter and ensure our open spaces are thoughtfully stewarded for generations to come. We urge you to consider and take action on the following recommendations.

1. Prioritize Master Plan Goals to Reflect Charter Intent

Currently, the Trail System Plan draft states that all goal statements are "equally applied in the decision-making process." Stating that every goal is equal abdicates the primary purpose of a master plan. High-level planning requires making deliberate choices about what comes first, especially when balancing recreational access with environmental protection.

Article 15 of the City Charter establishes ecological protection as the foundational requirement for our open space system. To honor the Charter and reflect leading stewardship practices, Council must establish a clear hierarchy of prioritized goals for both plans rather than treating all goals as equal. We recommend:

Trail System Plan Goals (Ranked Priority Order):

1.

Protect natural resources through data-informed management practices.
(Primary Mandate)

2.

Enhance safety for all users.

3.

Formalize trail design standards, maintenance, operations, and construction protocols.

4. **Improve trail connectivity.**
5. **Adopt a social trail policy.**
6. **Support funding and partnerships.**

PROS Guidebook Open Space Goals (Ranked Priority Order):

1. **Establish a comprehensive ecosystem of natural open spaces in Louisville.**
2. **Advance science-based data to support informed land management decisions.**
3. **Promote environmental stewardship.**
4. **Ensure recreational access is designed and managed to protect underlying ecological integrity. *(Revised from generic "balance" to clarify that environmental protection is the baseline priority)***
5. **Support funding and partnerships.**

2. Restore System-Wide Ecological Balance

When the four charter land classifications were originally established, the intent was to maintain an equitable distribution to ensure robust protection across the system. However, the proposed breakdown in the PROS Guidebook allocates only 6% to Preserve and 30% to Protected Lands, while Visitor and Other Lands absorb nearly 60%.

To restore true balance and protect habitat integrity, Council should direct staff to utilize accepted recreation ecology practices alongside our new 2026 vegetation mapping to rebalance the system, aiming for roughly 50% dedicated to Preserve and Protected status (with ~25% in Preserve).

3. Apply Data-Informed Protection: Dutch Creek Riparian Area

Dutch Creek near the Coal Creek Trail serves as a clear example of where land

classification needs correction. In this area, the "Preserve" designation was inexplicably applied to only a fraction of the "Eastern Cottonwood...Floodplain Woodland" vegetation association, leaving vital riparian habitat unprotected.

Under Section 15-4, Preserve lands must be characterized by moderate to high ecological importance and supported by sufficient buffers. Council should direct staff to expand the Preserve classification to cover all contiguous riparian areas along Dutch Creek, including a standard 120-foot buffer, while actively closing and restoring the damaging undesignated social trails in this sensitive corridor.

4. Remove Ecologically Damaging Trail Alignments (Trail 18)

To demonstrate a genuine commitment to resource protection, Council should remove proposed Trail 18 (Page 54 of the Trails Plan), which proposes an off-street connection between Campus Drive extension and the Coal Creek Regional Trail.

Aligning a trail along the Goodhue Ditch directly damages sensitive riparian zones, fragments critical habitat, disrupts agricultural operations, and presents severe crossing hazards at Dillon Road. If a connection in this area is necessary, connectivity should be routed along 96th Street using existing signalized crossings rather than intruding into sensitive open space.

5. Correct Misleading Charter Interpretations in Plan Graphics

Finally, plan graphics stating that "HIGH HABITAT FRAGMENTATION IS PERMITTED" under "Visitor" and "Other" classifications are inaccurate. Section 15-4 of the City Home Rule Charter does not grant permission for high fragmentation; it simply recognizes that these lands already experience higher relative fragmentation as an existing baseline condition.

In fact, Section 15-4(b)(3)(B) explicitly mandates that even Open Space-Visitor Land must be managed so that recreational opportunities are "designed to encourage resource protection." Mischaracterizing descriptive baseline attributes as "permitted management outcomes" misleads the public and undermines Article 15.

Staff and consultants have built a solid foundation, but setting policy hierarchy and ensuring strict Charter compliance is Council's responsibility. We ask Council to direct staff to incorporate these priority rankings, mapping corrections, and graphic revisions before adopting the final plans.

Thank you for your leadership and dedication to Louisville's open spaces.

Respectfully submitted,

**Helen Moshak, Louisville Resident on behalf of
Louisville Open Space Advocates (LOSA)**

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

PLEASE INCLUDE IN MATERIALS FOR COUNCIL MEETING August 25th, 2026

Mark Cathcart, Louisville Resident.

City Council, Mayor, City Manager,

You're meeting today to hear from Director Blackmore and staff about the PROS Guidebook — the document that's supposed to shape how Louisville invests in parks and open space over the next five years. But let's be honest: you're sitting at the intersection of how budgets get allocated and where investment goes into our neighborhoods.

A lot of our parks need renewal. Over the last 20–25 years, both the requirements and expectations for playscapes have changed dramatically.

Coincidentally, this year marks 20 years since the council and **Mayor Sisk** approved an entire neighborhood on the promise of the revenue it would generate. \$4-\$6 million surplus he claimed.

We all agree Louisville needs to be more affordable and I'm not against development — but **it is the nature of that development that matters**. Affordability and quality are about more than the price or square footage of a house.

Since Mayor Sisk lauded the value of the North End neighborhood, the city including those on the current dais have approved some more new neighborhoods. Not one of them required the developer to build a city park, provide a playscape, or include any real “third place”. Density and height are the easiest, laziest ways to pack more people into a project. Developers don't want to build anything that isn't housing, the city won't pay for it, leaving the maintenance to be pushed on the HOA.

Louisville has great parks — big lawns, mature trees, real playgrounds. Spending a quarter-million to half-a-million dollars to refurbish those parks is a smart investment in the neighborhoods that already exist. New, dense, or tall neighborhoods deserve the same level of thought and investment. The council decides what these neighborhoods look like and what facilities they have.

If the council keeps approving new neighborhoods the way it has been, it's creating a housing pyramid: established single-family neighborhoods with big yards and decades of public benefit on one side, and new neighborhoods with condos, townhomes, and tiny yards on the other.

None of the new neighborhoods follow the model we used in the '80s and '90s. No community third places. No pool. No park. No playscape. Homeowners associations pay to maintain and water city-owned tree lawns, replace trees, and they're stuck maintaining odd little "common areas," alleyways, and even drainage ditches meant to protect older neighborhoods. Everyone pays the same sales tax, the same mill levies, the same fees for water, roads and trash.

Yes, people know this when they buy or rent, or at least they should. Except they don't - it's the same for the people in established neighborhoods. Had any complaints about noise and parking from people who don't live "there" - The council did that.

The PROS Guidebook talks about future parks but doesn't say a single word about **where** they should go or **how** they should be allocated.

Making new neighborhoods affordable and equitable doesn't mean a two-mile round-trip walk just to put your toddler in a swing. Meeting your neighbor shouldn't require getting in a car - even an electric one - and driving across town so your preschooler can run around in the grass. And it shouldn't mean the city shrugs its collective shoulders when new neighborhoods age poorly because residents are expected to "go somewhere else" for everything.

This is your choice. Your decision. Please give Director Blackmore clear direction to identify and pursue real opportunities to provide city facilities in new neighborhoods. The alternative is creating 2-tier neighborhoods where new residents pay for the public benefit in established neighborhoods who have already had 20+ years of benefit.

--
++Mark.

Subject: August Stakeholder Update: Become an RTD ambassador, new mobile app launches, K-9 units awarded, and new leaders join RTD

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Stakeholder Update

August 2026

Community Connections

This month, RTD is recruiting community ambassadors to help shape the future of transit and rolling out the new all-in-one NextRide app, giving customers on-the-go access to transit tools, Customer Care, Service Alerts, and fare purchasing in one convenient place. A quick-thinking RTD bus operator recently assisted in a rescue, and RTD Police K-9s supported partner agencies in deterring threats. Read on for the latest updates – including how new drainage systems and extreme temperatures are helping bring new embedded rail track downtown to life.

RTD CONNECT: Be part of what's next

RTD CONNECT is kicking off a districtwide rethink of the transit network, with an 18-month effort to align service with today's travel patterns and future needs. RTD has launched the Community Ambassador Program – a chance for residents to share local insight, spread the word, and ensure each district's priorities are heard. RTD is recruiting 30 ambassadors across its 15 districts, with applications open through Aug. 28.

RTD will also invite community feedback on upcoming service proposals, from short-term 2027 changes to the agency's long-range vision. Your voice can help shape how the region moves next.

Shaping future transit

What is RTD CONNECT?

NextRide: Your new all-in-one transit app

The new app is here.

RTD's new **NextRide** is an all-in-one app that gives customers the ability to purchase digital fare, view schedules, real-time vehicle locations, and Service Alerts – all while on the go. The mobile app offers customers transit tools for each step of their journey, including the ability to make security reports and contact Customer Care. The app supports 10 languages to maximize accessibility. Download it now on the [Apple App Store](#) or [Google Play](#).

[All the features](#)

[How to use NextRide](#)

September service changes bring new SkyRide service

The next round of service changes take effect Sunday, Sept. 27. RTD is maintaining the overall service hours from June with continued rail options during

the Downtown Rail Reconstruction Project. A new SkyRide – bus Route AL – will be introduced to make hourly connections from Longmont to Denver International Airport.

Visit Service Changes to be ready for all the updates!

See what's in store for September

Open-door program delivers results

Click to see which stations achieved the largest reductions in illicit drug activity reports and maintenance issues.

RTD's Customer Experience Elevator Program continues to show meaningful results, reducing calls for service, reports of illicit drug activity, and maintenance requests – by as much as 77%. The strategy of keeping elevator doors open when not in use has consistently proven effective across RTD stations.

Transit Police launched the program in 2024 at three initial stations. Due to its success, elevators at 19 stations have been reprogrammed as of August to support a more welcoming environment for customers.

A tactic that delivers

Making transit secure

Hot stuff: 4500°F heat advances rail project

Paul Von Fey, RTD Senior Manager of Engineering Design and Configuration Management, highlights recent progress at the intersection of Seventh Street and Colfax Avenue as part of the Downtown Rail Reconstruction Project.

Before new embedded rail track can be installed, crews completed a drainage system designed to keep water away from the rail to ensure long-term stability.

Work will move to Stout at 15th and 16th streets, with improvements to the Downtown Loop on the horizon.

Learn how crews are laying the groundwork for years to come – and what molten material forms when aluminum powder and iron oxide react at 4500 degrees Fahrenheit.

Watch: downtown rail progress heats up

RTD operator's quick actions help save trapped man

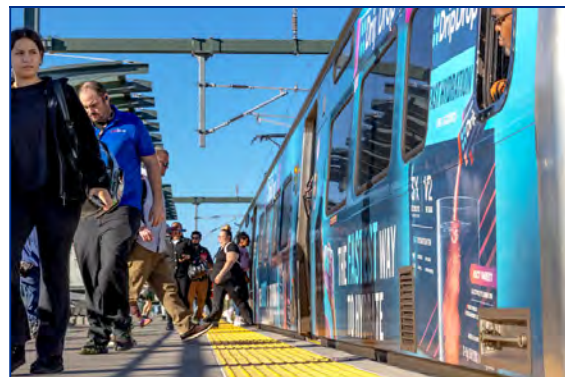

RTD bus operator Hanafi Ahmed discovered and helped rescue a man trapped in a 15-foot trench near RTD's bus operations facility on June 14. After hearing calls for help following his shift, Ahmed found the individual and alerted his supervisor Shaquila Rhone, who contacted 911, bringing West Metro Fire Rescue crews to the scene. Thanks to Ahmed's commitment to being of service, the injured man – trapped for nearly 24 hours – was lifted to safety.

A call to help

RTD seeking Citizen Advisory Committee members

RTD is seeking community members interested in public transit to fill six openings on the Citizens Advisory Committee, a 17-member group that advises on transit strategies and programs.

Applicants should live within the RTD district and demonstrate interest in transit, community service, and regional collaboration. Applications will be accepted through Monday, Sept. 14 and selected members will begin a three-year term in January 2027.

Learn more and apply

RTD invests in nine community projects

Westracks bus shuttles were launched this year as part of 2026 Partnership Program funding. The shuttles run to RedRocks on weekends from Jefferson County Government Center Station.

[See the selected projects](#)

Local mobility gets a lift as RTD has selected nine new pilot projects for its fourth round of Partnership Program funding – the biggest investment in the program’s history.

With \$6 million available each year for 2027–2029, communities across the metro area will see expanded on-demand options, extended service hours, and stronger local connections in places like Adams and Douglas counties, and cities of Brighton, Englewood, and Longmont.

The pilot projects build on a growing lineup of locally driven mobility solutions that are helping RTD meet evolving travel needs through community partnerships.

Investigations go to the dogs: RTD K-9 units awarded for explosives detections

When threat detection requires highly specialized skills, RTD Transit Police (RTD-PD) K-9 units step in. RTD officers Corey Averill with K-9 Milo and Jesse Robinson with K-9 Reign were honored by the National Police Canine Association (NCPA) during a June 17 award ceremony for their assistance in

“Both incidents involved our K-9 teams assisting law enforcement agencies throughout the Denver metropolitan area that do not have explosive detection canine resources,” RTD Chief of Police and Emergency Management Steve Martingano said.

two separate investigations involving explosives detection.

Left to right: Officer Corey Averill with K-9 Milo; Officer Jesse Robinson with K-9 Reign

Heroic talents

Operators trial the bus-only lanes on East Colfax

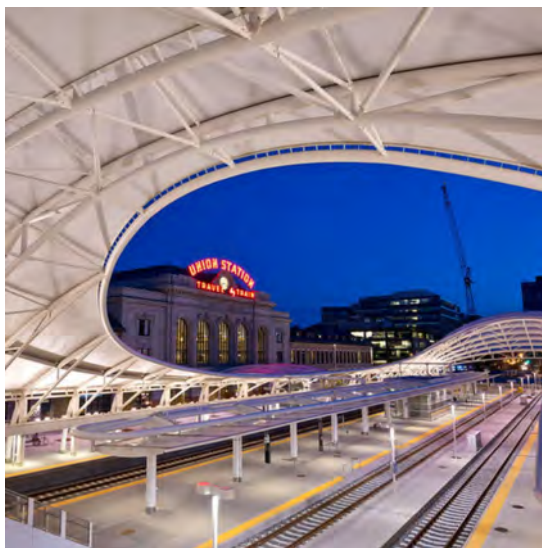

Training is underway for more than 200 RTD bus operators as the East Colfax Bus Rapid Transit project gears up for Bus-Only Lane Operations (BOLO) this fall.

Operators are practicing in the new center, bus-only lanes — closed to all other vehicles — and preparing to use transit signal priority for faster trips.

Customers on the 15 and 15L will continue using their current stops while center BRT stations remain closed during construction and testing.

Operators leveling up

RTD secures major savings with 2026A FasTracks refunding

RTD has successfully closed its 2026A FasTracks refunding, securing \$20 million in savings despite a turbulent bond market. Strong investor confidence — boosted by RTD's robust financial position and Colorado's resilient economy — helped the agency deliver solid results even as interest rates climbed.

Navigating the market

Leadership Updates

Welcome to a new Board Director

Joyce Browning was sworn in to the RTD Board of Directors on July 28, representing District J. She brings three decades of public service experience, including serving as a mayor and city council member in Northglenn. Browning, appointed by the Adams County Board of Commissioners, will serve through the end of 2026, when voters will elect a new District J representative.

[About Joyce Browning](#)

New Chief Communications and Engagement Officer

Candace Smith will serve as RTD's new Chief Communications and Engagement Officer, effective Sept. 8. She brings more than 25 years of strategic communications experience across higher education and public transportation. In this role, Smith will strengthen RTD's customer-focused mission and oversee Community Engagement, Public and Media Relations, Marketing, and Customer Care.

[Welcome Candace Smith](#)

Small business open house brings 170+ vendors to RTD

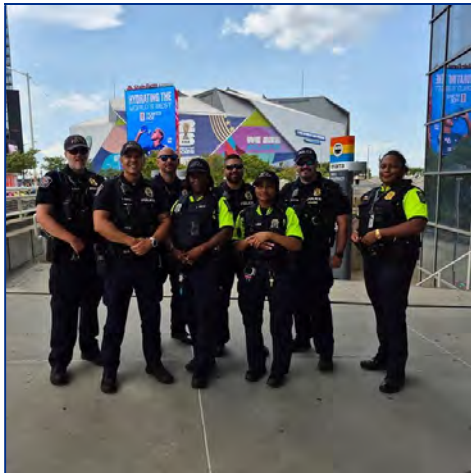

RTD's Small Business Opportunity Office and Contracting and Procurement Division welcomed more than 170 local, small, and disadvantaged business representatives to the agency's first in-person vendor open house at Blake Street.

Attendees received guidance from RTD leaders, practical tips on bidding and certification, and one-on-one conversations with project managers from 11 departments.

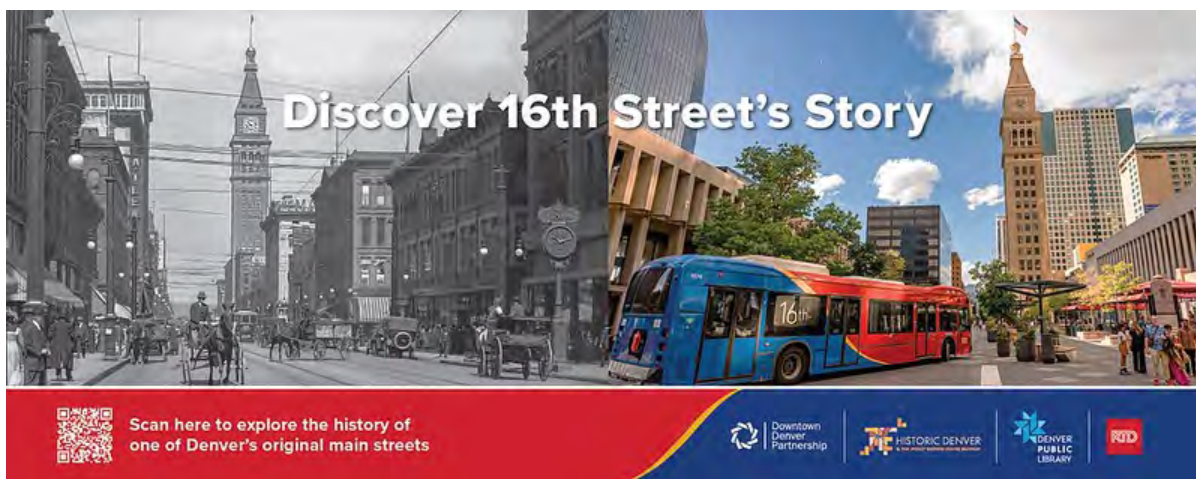

Small business support

Transit Police assisted World Cup patrols

RTD Transit Police supported the Metropolitan Atlanta Rapid Transit Authority during the 2026 FIFA World Cup, assisting with crowd patrols throughout the event in Atlanta. The experience gave officers valuable insights into managing high-volume, high-energy environments to bring back to the Denver RTD community.

Subject: RE: Path Forward for Staff's Recommended Roundabout Evaluation — Pine Street/Via Appia
Date: Friday, August 21, 2026 2:54:16 PM
Attachments: [image001.png](#)
[image002.png](#)

Hi Shane,

Thank you for reaching out regarding traffic operations and safety at the intersection of Pine Street and Via Appia Way.

As noted in the 2024 traffic study, a roundabout is one of the potential intersection improvements that could be considered at this location, and the traffic analysis indicates that a roundabout would likely perform well from an operational standpoint. However, there are additional factors that need to be considered beyond traffic operations, including construction cost, available right-of-way, maintenance and snowplowing operations, and emergency access and evacuation considerations.

As part of our continued evaluation, Public Works recently considered a modular roundabout as a potential lower-cost pilot project at Pine and Via Appia. Staff discussed the operation and maintenance of similar installations with public works agencies in Nebraska and Ohio. Based in part on concerns those agencies identified with snowplowing and long-term maintenance, staff did not recommend moving forward with a modular pilot at this time. That evaluation does not preclude consideration of a permanent roundabout or other intersection improvements in the future.

At this time, however, there is not a programmed project or definitive timeline for constructing a roundabout at Pine and Via Appia, and we have not identified a DRCOG or other grant funding opportunity specifically for this intersection. We will continue to monitor the intersection and evaluate opportunities as future capital projects and funding become available.

One logical opportunity to revisit intersection improvements would be when Via Appia is next resurfaced. Coordinating the work with a larger roadway project can reduce construction costs and impacts compared with completing the intersection as a standalone project.

We also plan to collect updated speed and volume data as part of the City's next round of citywide traffic counts and will continue to review crash history at the intersection. Previous speed data collected following the summer 2024 lane reconfiguration

indicated that 85th-percentile speeds on Via Appia decreased by approximately 5 mph.

For additional background, the City Council discussed Via Appia and potential intersection improvements, including roundabouts, in some detail at its February 24, 2026 meeting. The meeting materials and video are available here:

<https://louisvilleco.portal.civicclerk.com/event/10/overview>

Thank you again for reaching out and for your interest in the safety and operation of the corridor.

Regards,

Jordan Jefferies, PE

Assistant City Engineer

Subject: Path Forward for Staff's Recommended Roundabout Evaluation — Pine Street/Via Appia

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Dear Mayor Leh, Mayor Pro Tem Hamlington, and Councilmembers Cooperman, Dickinson, Fahey, Hoefner, and Kern,

I am writing to ask Council about the path forward for evaluating a roundabout at the intersection of Pine Street and Via Appia Way, an option the City's own traffic study recommends pursuing, but whose timeline I am not aware of as a resident.

For context: I've had an extended email exchange with Engineering staff on this topic, which I'm forwarding along with this message. I want to be clear that I support the broader Via Appia road diet and the safety gains it has produced along the corridor. My concern is specific to the Pine Street intersection, which today operates as a two-way stop (cross traffic on Via Appia does not stop). As a driver interacting with the intersection at minimum twice a day, making a left turn or crossing Via Appia from Pine during peak hours (or even just midday on a random Saturday, like today) requires finding aggressive, arguably unsafe, gaps in traffic. As a pedestrian or cyclist, crossing at Pine is even more precarious, with no active warning device at the crossing.

What I did not know when I first reached out to staff is what the City's own February 2024 Traffic Study Summary for Via Appia (prepared by Mary Hamann, P.E.) already concludes:

1. Staff's own Recommendation #4 in that study is to "continue to monitor traffic at Pine Street... and evaluate the need for a roundabout or other intersection improvements." The study further states that "alternative intersection geometry, such as a circular intersection or roundabout, should be considered at the intersection of Pine Street and Via Appia to improve the operations and safety at this intersection."

2. The study's own traffic modeling shows a roundabout performing well at this intersection. At PM peak, a two-lane roundabout produces a Level of Service of A with 7.1 seconds of average delay — better than a two-lane all-way stop (LOS B, 14.0 seconds), and on par with the pre-road-diet four-lane all-way stop (LOS A, 7.9 seconds).

3. The same study documents that Via Appia's measured 85th-percentile speed at Pine (42 mph) already triggers the MUTCD's high-speed warrant, and that one of the two cyclist-injury crashes recorded on the corridor occurred specifically at the Pine Street crossing.

As a resident, I'd appreciate understanding whether there is a defined path and timeline for the roundabout evaluation described in Recommendation #4, and would ask Council to:

1. Share the status of that evaluation, including any grant or DRCOG funding avenues being pursued for feasibility and design; and

2. Share updated speed, volume, and crash data for the Pine Street intersection specifically, so residents can track progress.

My full correspondence with Engineering staff is attached for reference.

Thank you for your time and attention to this.

Shane Simonson

593 Wildrose Way, Louisville, CO 80027

On Mon, Jul 20, 2026 at 11:14 Cameron Fowlkes <cfowlkes@louisvilleco.gov> wrote:

Shane

Thank you for your thoughtful follow-up and for taking the time to review the City Council presentation.

To address your questions:

1. Evacuation & Delay Trade-offs:

I would not characterize the decision as prioritizing emergency evacuation over operations at the Pine Street intersection. Rather, the analysis considered the overall performance of the Via Appia corridor, including traffic operations, safety, multimodal accessibility, project cost, and long-term maintenance.

2. Pedestrian Crossing Upgrades:

The City is continuously evaluating opportunities to improve pedestrian and bicycle crossings throughout the community. At this time, there are no funded plans for an active pedestrian crossing beacon at Pine Street. Devices such as Rectangular Rapid Flashing Beacons (RRFBs) are evaluated using established engineering guidance that considers pedestrian volumes, vehicle volumes, roadway speeds, roadway geometry, sight distance, and crash history.

Additionally, RRFBs are most effective when they are installed selectively at locations that meet engineering warrants. Installing too many RRFBs along a corridor can reduce their overall effectiveness and driver compliance by creating "warning fatigue," making motorists less likely to respond consistently to the devices.

We appreciate you sharing your firsthand experience as both a driver and a pedestrian. Public feedback is an important part of identifying locations that warrant additional review, and we will continue to monitor the operation and safety of this intersection as part of our ongoing transportation program.

Thank you again for your thoughtful questions and your interest in improving transportation safety in Louisville.

Hi Cameron,

Thank you for the detailed response and for sharing the link to the February City Council presentation. The background and context were extremely helpful. It's clear that a tremendous amount of thought and engineering effort has gone into the Via Appia corridor.

To be clear, I support the broader lane reduction on Via Appia. My primary concern is specifically focused on the operational safety at the Pine Street intersection.

A couple of quick follow-up questions regarding the trade-offs and near-term plans:

1. Evacuation & Delay Trade-offs: Is it fair to say that the roundabout was ultimately passed over because maintaining corridor throughput on Via Appia (particularly during emergency evacuations) took priority over easing side-street friction on Pine? Or is that oversimplifying the justification?
2. Pedestrian Crossing Upgrades: Anecdotally from just this week, crossing Via Appia at Pine on foot and bike for the Street Faire and Farmers Market felt very precarious without active warning devices. Is Pine Street being evaluated for an active crossing signal, like those near the Rec Center, or pedestrian refuge islands as part of the near-term

improvements?

As a driver, making a left turn or crossing Via Appia from Pine during peak hours currently requires aggressive—and at times borderline dangerous—gaps to execute.

I really appreciate your time, engagement, and willingness to discuss.

Shane

On Mon, Jul 20, 2026 at 09:55 Cameron Fowlkes <cfowlkes@louisvilleco.gov> wrote:

Thank you for taking the time to share your concerns regarding the intersection of Pine Street and Via Appia Way.

The City understands that traffic patterns changed following the Via Appia roadway reconfiguration, and we recognize that intersections can operate differently as drivers adjust and travel patterns evolve. We take concerns about the safety of pedestrians, bicyclists, and motorists seriously. The new configuration creates a safer condition for pedestrians (less lanes of traffic to cross) and a more predictable conditions for motorists (having to navigate 2 lanes vs 4 lanes)

As part of the improvements, staff reviewed traffic volumes, crash history, sight distance, operational characteristics, and field observations to identify any potential operational or safety improvements. As part of that process, we evaluate a range of possible solutions based on engineering analysis, applicable design standards, and available funding. A roundabout is one of several alternatives that were considered. While a roundabout does create a better scenario for the Pine Street vehicular traffic, it can also create delays for traffic on Via Appia. We are currently looking at improving the pedestrian crossings at several intersections along Via Appia within the next few years including pedestrian refuge islands and directional crosswalks.

City council did discuss the Via Appia corridor at the February 24th City Council meeting and the video can be reviewed here(move video to 1:17:00 for start of the presentation and discussion) :
<https://louisville.ompnetwork.org/embed/sessions/335865/02-24-26-city-council-special-meeting>;

Thank you again for bringing this matter to our attention and for your interest in improving transportation safety within the community.

Subject: Intersection of Pine and Via Appia

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Hello—

I am writing to express my growing concern regarding the safety of the intersection at Pine Street and Via Appia Way, and to formally request a traffic study to evaluate long-term improvements.

As you know, Via Appia was reduced from a four-lane road to a two-lane road. While this may have had benefits elsewhere, it has created a severe bottleneck and safety hazard at this specific intersection. Because Pine Street serves as a major artery into downtown Louisville, the volume of cross-traffic far exceeds what a simple two-way stop can safely manage.

The current configuration is dangerous for everyone. Whether navigating the intersection by foot, by bicycle, or in a vehicle, crossing or merging onto Via Appia requires taking unsafe risks due to the traffic volume and sightlines.

I strongly urge the city to conduct a traffic study here and to explore safer alternatives, such as a roundabout, which would keep traffic flowing while significantly improving safety for pedestrians, cyclists, and drivers alike.

Could you please let me know if this intersection is currently on the city's radar for improvements, or how we can get a traffic study initiated?

Thank you for your attention to this important community safety issue.

Sincerely,

Shane Simonson

Subject: Homeless people living in culvert by the 36 bridge
Date: Thursday, August 20, 2026 9:28:01 AM

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

August 20, 2026

Greetings,

I'm writing to let you that I'm very concerned about the homeless people living in the culvert on 36th next door to the bridge that connects Louisville to Superior and the Coal Creek path and golf course. This tunnel is next door to the Coal Creek, creek. This encampment started off small, now it has grown. This morning on my walk from my home on Dillon road to Superior on the coal creek bike path, I saw a man washing in the creek. I don't know where these people are using a bathroom since there isn't one close by. One of my biggest concerns is that they will start a fire once the weather gets cold. My husband and I lost our home in the Marshall fire and we are extremely worried of another fire in our area. We are all trying to be proactive to mitigate any future fires, and allowing people to live there with no restrictions makes no sense. When it is windy, it gives me a lot of anxiety that they may start a fire. One solution I think that may work is to close off both ends of the area, on the Louisville side and the Superior side with metal fencing that they can't take down. Please contact me and let me know what your thoughts are and what can be done about this problem. I'd be more than happy to show you the area.

Regards,

Mariana V. Schmahl

10TH Annual Sustainable Transportation Summit

Creating a Transit Vision for the Future

August 25, 2026

On August 25, transportation leaders, elected officials, planners, and policymakers will gather to discuss the issues shaping mobility across the northwest metro region.

You'll hear from an outstanding lineup of speakers, including keynote speaker David Bragdon, along with leaders from RTD, CDOT, DRCOG, the Colorado General Assembly, Front Range Passenger Rail, Denver DOTI, and local governments throughout the region.

You'll also have the option to participate in the Longmont Mobility Tour, where transportation planners will provide a firsthand look at innovative projects helping shape the future of multimodal transportation.

If you've been meaning to register for the [10th Annual Sustainable Transportation Summit](#), now is the time!

**** Registration closes at noon on Friday, August 21! ****

We look forward to seeing you on August 25.

Subject: Bring back the large No Dogs signs at Harper Lake
Date: Wednesday, August 19, 2026 10:35:41 AM

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Dear Council,

I love all the new wayfinding signs that have been put up around the nd town. Bravo!

However, apparently these small no dogs signs are not li enough. I just encountered someone walking her dog around Harper Lake. When i told her there were no dogs allowed, first she said she didn't see signs. Then she said.that she has lived here for 15 years and didn't know there were no dogs allowed at Harper Lake. Then she said the signs must be new.

Please bring back the large no dogs allowed signs.

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe

Dear Mayor and City Council,

Thanks for your efforts to increase the number of affordable housing units in Louisville. And thanks for including my letter to Planning Commission in your packet.

I have a few concerns about this ordinance.

- This revision to the ordinance will increase the number of affordable units. But with increased density, it will bring the percentage of affordable units down. Increased new-build market rate units could drive up average prices in Louisville.
- The increased AMI threshold for for-sale units will diminish the desired benefit to low income households. It will also make the units more difficult to sell because the difference between market rate and affordable is smaller.
- A higher fee in lieu would provide additional incentive.
- The density and height increases are too difficult to understand or predict because the baseline densities and heights are not clear.
- The staff report doesn't estimate the dollar value of the savings or economies of scale to be achieved through incentives and the reduction in development fees. This would help the public understand the potential benefits, budget impacts, and opportunity costs for Louisville.
- The staff report mentions that building affordable units doesn't "pencil out". The report should research or cite research into project-level financial data.

I have heard many discussions on affordable housing in Boulder county and Louisville and many other ideas that I believe may be more effective (some already in our housing plan). I am shocked that you have not received more input from the public on this topic! Would you please consider postponing this decision until after more questions are answered? Though I cannot find it on the website now, I do recall the last IHO was posted on Engage Louisville. I hope you can wait and do more public outreach.

Sincerely,

Tamar Krantz

Louisville

Thank you for sharing your concerns.

The structural requirements were not related to underground coal or mineral work. It was considered to ensure damaged and faulty concrete and support the earth during its current use as existing structure. The City is required to upgrade earth slopes to AASHTO standards whenever a project is constructed or rehabilitated.

Subject: Urgent Traffic Safety Request – Pedestrian Crossing Lights at Via Appia and Via Capri

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Dear Josh Cooperman and Caleb Dickinson,

We are writing as concerned resident of Louisville to formally request a traffic safety evaluation and the installation of pedestrian crossing lights (such as Rectangular Rapid Flashing Beacons, or RRFBs) at the intersection of Via Appia and Via Capri.

This intersection currently poses a severe safety hazard to pedestrians, particularly local school children. Our daughters, along with several other neighborhood kids, cross Via Appia at this exact location daily to reach their school bus stop. We regularly experience three major safety risks at this crossing:

- **Blind Curve and Sightline Deficit:** A distinct curve in Via Appia immediately before the crosswalk severely limits visibility. Oncoming drivers traveling around the curve have almost no reaction time to see pedestrians already stepping into the street.
- **High Traffic Volume and Poor Yield Compliance:** Via Appia is a heavily traveled corridor, and motorists frequently fail to stop or yield to pedestrians waiting at or using the crosswalk.
- **Vulnerable Pedestrian Commuters:** Young students are forced to navigate this high-risk crossing twice a day during peak morning and afternoon traffic hours.

Given the combination of limited sightlines and high vehicle speeds, active traffic-calming measures are urgently needed before a severe collision occurs. We respectfully request that the City take the following steps:

1. Perform a formal sight-distance, speed, and traffic safety assessment at Via Appia and Via Capri during school commute hours (7:15–8:30 AM and 2:30–3:45 PM).
2. Approve and schedule the installation of pedestrian-actuated flashing lights (RRFBs) to alert drivers around the curve.
3. Coordinate short-term speed mitigation, such as placing an electronic speed radar trailer near the curve during bus hours.

Thank you for your dedication to keeping our neighborhood streets safe. We look forward to your response and learning about the next steps for this evaluation.

Sincerely,

Jennifer & Brian Lenihan

Subject: Concern With New Crosswalk Design
Date: Tuesday, August 18, 2026 7:59:38 AM
Attachments: [6558.png](#)

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Picture was taken on main and Griffith in Louisville, Colorado near the middle school on August 17th. 2026.

Hi,

I wanted to raise a concern about the new crosswalk configuration at this intersection.

The crosswalk has been pushed back from the corner into the area where drivers naturally need to pull forward to see approaching traffic. As a result, drivers often have to stop directly in the crosswalk while waiting to safely turn.

I've also noticed that the new crossing doesn't follow the natural path of the sidewalk. Pedestrians and kids on bikes frequently bypass it and continue straight, sometimes going off and back onto the curb instead.

I understand the intent is to improve pedestrian safety, but the way people are actually using the intersection seems very different from how it was designed to be used. Could the City review whether this configuration is functioning as intended?

I've also talked to many of the residents here who are very confused by this concrete replacement project and most people found it unnecessary and everyone just assumed that they were just fixing pipes or electrical underneath the concrete and that's the only reason they had to replace it. Is this true?

Thank you.

Subject: BVSD Enrollment Impacts: Proposal presented to Board August 25

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Good morning community leaders!

A week from tonight, we will share our proposal for making BVSD schools more resilient in a time of declining enrollment.

The Board of Education meeting will begin at **3 p.m. on Tuesday, August 25, at the BVSD Education Center in East Boulder**. You are welcome to join us in person or watch online [on BV22](#).

This summer, our leadership team has been hard at work evaluating options for elementary-level schools in Boulder, Broomfield and Louisville/Superior, guided by the community feedback we gathered last spring and a careful review of enrollment, facilities and other important factors.

Yesterday, we sent out the latest edition of our **BVSD Enrollment Impact newsletter**, which includes helpful information and context to get you up to speed before next week's presentation.

I'll share the proposal with you next week, but in the meantime, please don't hesitate to reach out if you have any questions.

Randy

BVSD Enrollment Impacts

Preserving the educational experience for all students

August 2026

Resilient Schools proposal presented to Board August 25

This has not been a restful summer for the team here at BVSD.

Our leadership team has worked diligently to evaluate options involving potential school consolidations, closures and reconfigurations. They have analyzed enrollment trends, building capacity, facility conditions and long-term student needs. They weighed the potential challenges of many possibilities and constructively questioned their own thinking.

Now, our team is preparing to present our proposal, reasoning, and next steps of the process to the Board of Education on August 25. We hope you attend or watch.

As we've shared throughout this process, our goal is to create a more resilient school district that continues to provide an exceptional educational experience despite declining enrollment.

We knew from the beginning there would be no perfect solution. Every option comes with tough challenges, and this work has been every bit as difficult as we expected.

Our team has remained mindful that every proposed change affects students, families and staff members. Those individuals have been at the center of every conversation and every decision.

Every BVSD school is extraordinary because of the people who learn and work there. While buildings are important, our responsibility is to ensure that every student has access to the strongest possible educational experience. Addressing declining enrollment now will help preserve the high-quality instruction, programs and opportunities our students deserve for years to come.

No matter what lies ahead, our commitment remains the same: to work together, support one another and ensure that every student, family and staff member is cared for throughout this transition. They are, and always will be, what matters most.

- Understanding the Challenge
- Timeline

Proposal Development

Developing the Board of Education proposal for school adjustments

Next week, the Board of Education will have its first opportunity to consider and discuss specific school adjustments aimed at making our school district more resilient in this time of declining enrollment. The proposed changes will include school closures, consolidations, and reconfigurations. **The worksession will be held Aug. 25 at 3 p.m. at the Education Center** and will be broadcast on BVSD's Education Access station, [BV22](#) (Comcast Channel 22) or [online](#) and simulcast on the [BVSD Board YouTube channel](#).

[Read on to learn more](#)

Before developing a proposal, we listened to our community

 Closing schools is one of the most difficult tasks a school district can face. We knew it was vitally important to connect with our community to understand their perspectives and priorities before developing specific changes for the Board to consider. Consistent themes emerged from our [extensive community engagement effort](#) last spring:

Click the image to get an inside look at the community engagement sessions.

- Smaller class sizes
- Fewer multi-age classes
- More time for non-classroom educators and other school professionals to be in schools to support kids

[Read more about what we learned from our community](#)

Understanding the options

The Board has identified several different types of adjustments that could be made to schools to respond to declining enrollment and use resources more efficiently. These include introducing, expanding or relocating focus programs; reconfiguring grades between a pair of schools; consolidating two schools into one building and closing one or more schools and redistributing students.

[This video](#) provides the details.

Understanding the Challenge

Learn about what is happening with enrollment in BVSD and why it matters in this video.

Let's Talk: Livestream information session with BVSD leaders

This spring, BVSD leaders discussed the challenges of declining enrollment, its impacts on students and teachers, and potential district actions. They also answered questions from our BVSD community. Check out the discussions below.

Session I

The challenge of declining enrollment

[Watch the discussion](#)

Session II

The impact on our students and teachers

[Watch the discussion](#)

Session III

The options and next steps

[Watch the discussion](#)

How declining enrollment shows up in the student experience: One teacher's perspective

As a teacher in BVSD, I understand why smaller school sizes can sound appealing. Individual attention, close-knit communities, and familiarity are all positives. However, what often gets lost in the conversation is that very small schools come with significant challenges that directly affect the quality and consistency of education students receive.

[Read one teacher's perspective about what declining enrollment can mean for students](#)

Enrollment drops more than expected, Board expresses desire to take action to respond

BVSD's overall enrollment continued to decline last year, but at a greater rate than expected, BVSD Senior Planner Glen Segrue told the Board in an update in December. The student count dropped 525 students, or 1.9% from last year—1% more than projected. Over the past five years, the downward trend is less steep at 1.3%. This is BVSD's second biggest drop in enrollment since the pandemic. The district's enrollment has declined by nearly 3,600 students since 2015.

[Read on to learn more](#)

Board Decision Milestones

Proposal Discussion

Board Worksession, 3 p.m.

Staff will present a proposal of school adjustments to the Board for consideration and discussion.

Consistent with standard worksession format, there will be no public comment.

Proposal Discussion

Board Meeting, 5 p.m.

The Board will continue its consideration and discussion of the proposed changes.

The community will have the opportunity to provide input during the regular public comment period.

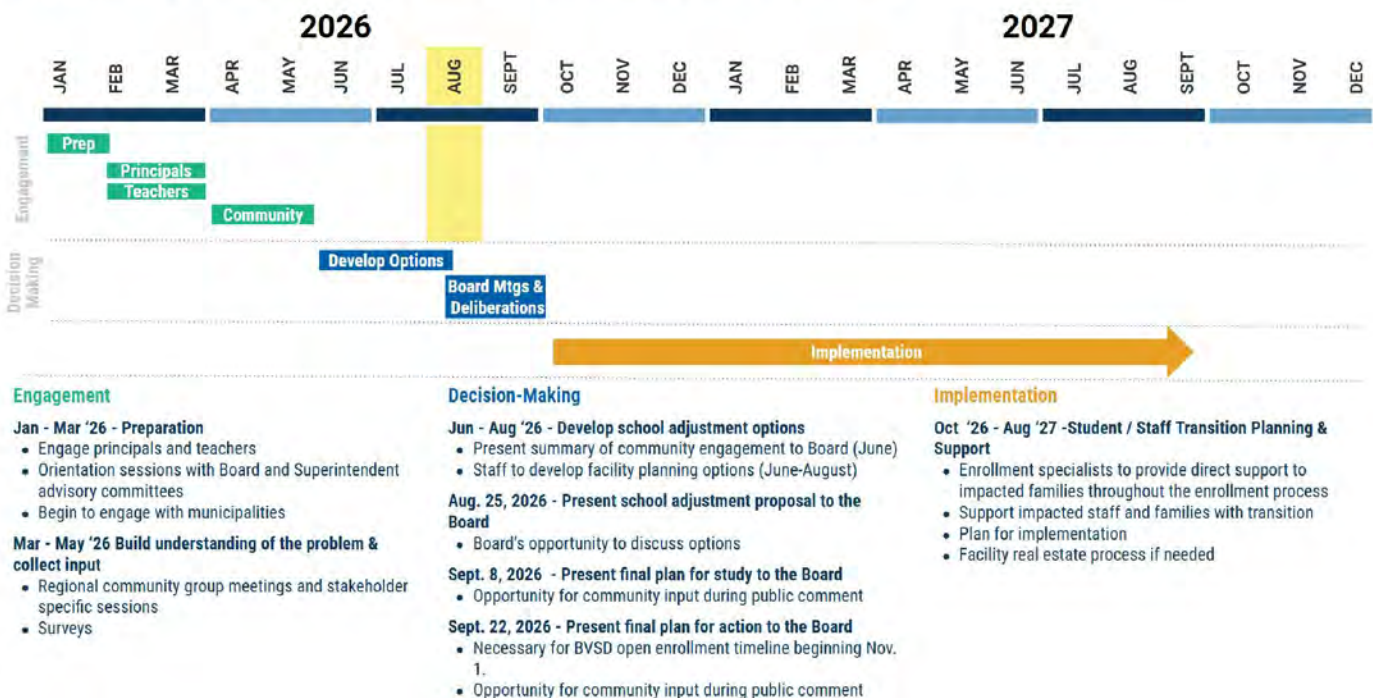

Proposal Action

Board Meeting, 5 p.m.

The Board will take action to adopt or deny the proposed changes.

The community will have the opportunity to provide input during the regular public comment period.

Overall Community Engagement & Decision Making Timeline

Subject: Invitation to Louisville Lens Opening Reception and Senior Dinner - Friday, September 4
Date: Monday, August 17, 2026 1:16:44 PM

Hello Mayor Leh and City Council Members,

We are entering the final act of our 2026 summer events season, but some of the best is yet to come!

I am proud and excited to invite you to the **opening reception of our Louisville Lens Community Photography Project from 4 - 7pm on Friday, September 4** in the Library. This project has become near and dear to my heart, and I look forward to sharing it with the residents of Louisville — I hope you will be able to make it and bring some friends and family.

You may have already seen [the fantastic video](#) that our photographer, Megan Sweeney, put together for the project on Instagram, but if you haven't, please feel free to take a look (or, like me, watch it for the hundredth time and still enjoy every second). We also have a work in progress [webpage for the project](#) on our brand-new website where we will continue to add more information.

On the same day as the opening reception, we will also be hosting the annual Senior Dinner at the Steinbaugh Pavilion starting at 5pm. Attendance for this event has been growing every year, and our seniors love to see and chat with their City Council members. We would love it if you stopped by to say hello on your way to or from the Louisville Lens reception.

Please feel free to reach out if you have any questions and I look forward to seeing you at these events!

Best,

Iris Belensky

Dear Mayor and Council Members,

I'm writing to share a quick follow-up to the letter submitted on behalf of Strong Towns Louisville ahead of Tuesday's discussion.

I want to emphasize that our recommendations aren't necessarily a call to throw out the Inclusionary Housing Ordinance altogether. Rather, we are asking Council to take a hard look at the underlying economics so that any updates we make actually result in real homes being built.

A recent analysis by Housing Forward Colorado titled "[Beyond the Debate: How Colorado Can Make Inclusionary Zoning Actually Work](#)" captures this exact dynamic (much thanks to a friend for sending this article). They point out that for inclusionary zoning to succeed in Colorado communities, the code must be anchored in development reality:

- Incentives must equal the actual cost gap. Density bonuses, height adjustments, and fee waivers aren't just perks, they have to mathematically offset the real financial gap of building an income-restricted unit.
- Offsets have to be granted by-right. If an incentive requires a separate Council vote or discretionary review, developers can't bank on it when securing private financing. That uncertainty wipes out the incentive's value.
- Mandates need broad zoning reform to work. Inclusionary policies can't carry the whole weight of our housing goals on their own; they need a flexible underlying zoning code to give projects room to succeed.

If Louisville stays on the path of updating its IHO, we should ensure the incentives are predictable, granted by-right, and genuinely offset the cost of constructing affordable units. In our attempt to create a more Louisville-specific IHO, we would encourage Council to exempt small infill projects of 10 to 12 units, swap rigid "like-for-like" requirements for flexible unit delivery, and launch a Market-to-Affordable buy-down program using existing housing funds.

Thank you again for your time and open door as we work together on thoughtful solutions for our city.

Warmly,

Andy Johnson
On behalf of Strong Towns Louisville

vCard

Dear Mayor and Council Members,

I am writing to share my analysis regarding the proposed amendments to the City's Inclusionary Housing Ordinance (IHO) (Title 17, Chapter 17.76). While I deeply share the goal of expanding affordable housing opportunities in Louisville, a critical review of the proposed ordinance highlights fundamental flaws in relying on an inclusionary housing framework. Rather than serving as a flexible, inviting tool, an IHO functions as a blunt instrument that tends more toward penalizing development, strains overall housing costs, and distracts from the core systemic reforms required in our land use code.

For reasons I'll explain below, I think the city should pause this work until after zoning updates are completed. But if you feel that it must be done now, I would like to suggest some critical amendments that will make it more effective. As written, I don't believe this ordinance will result in much, if any, new affordable housing being built. In fact, it may result in an overall decrease of new housing thereby increasing the cost of all housing.

Summary of Proposed Amendments

Staff has proposed a series of targeted updates to Chapter 17.76:

- **Area Median Income (AMI) Calibration:** Modifying affordability requirements to 12% at 80% AMI for rental developments and 12% at 80% to 120% AMI for for-sale developments.
- **Incentive Package:** Introducing a 20% density bonus (30% for 100% affordable rental projects), a 20% lot coverage increase, elimination of minimum parking requirements, and development review fee waivers for projects providing on-site affordable units.
- **Discretionary Height Increase:** Allowing City Council to grant an additional story or up to 15 feet of building height for on-site affordable housing projects outside the Old Town Overlay and Downtown Core.
- **Fee-In-Lieu Rate Updates:** Nearly doubling the fee-in-lieu for ownership housing from \$9.24 to \$19.08 per square foot, while slightly adjusting rental fees from \$4.72 to \$4.73 per square foot.

Research & National Evidence

A 2025 nationwide empirical study by The Pew Charitable Trusts ("New Housing Slows Rent Growth Most for Older, More Affordable Units") analyzed rent data across 1,654 metro-area ZIP codes and demonstrated that expanding overall housing supply, even through new, unsubsidized market-rate construction, is the single most effective driver of affordability for low-income residents. Pew's researchers found that every 10% increase in regional housing stock correlated with a 5% reduction in overall rent growth, with the steepest rent declines occurring in Class C apartments - older, naturally affordable buildings - by eliminating the intense competition that forces higher-income renters to bid down-market. Conversely, when housing supply is stifled by restrictive land-use policies or heavy regulatory tolls, lower-income neighborhoods suffer the most severe rent inflation, experiencing rent hikes 10 percentage points higher than wealthy areas. This data provides Council with critical evidence that imposing penalizing inclusionary fees over broad zoning reform is counterproductive; stifling general residential construction directly exacerbates regional competition, pushing naturally occurring

affordable housing out of reach for Louisville's workforce.

Recent economic modeling published by UC Berkeley's Turner Center for Housing Innovation ("Modeling Inclusionary Zoning's Impact on Housing Production") underscores the hidden mathematical risks of uncalibrated inclusionary zoning mandates and arbitrary fee hikes. Turner's research proves that as inclusionary requirements and fee burdens rise, communities experience steep diminishing returns in below-market-rate unit delivery alongside accelerating losses in total housing production. Most strikingly, the model established that if supply contraction causes unconstrained market rents to rise by just 0.8% per year, that subtle rent increase across the city completely negates the entire economic value of all private subsidies generated by the inclusionary ordinance. To avoid these self-defeating dynamics, the Turner Center strongly advises municipalities to shift away from mandatory, discretionary inclusionary frameworks in favor of voluntary, predictable "by-right" incentives paired with direct public funding mechanisms, such as revolving acquisition funds that buy down existing market-rate homes, to deliver scalable, long-term community affordability.

Critical Analysis of the Ordinance & Fundamental Concerns

1. "Stick" vs. "Carrot" and the Requirement for By-Right Certainty

An inclusionary housing ordinance relies primarily on a "stick" approach; compelling compliance rather than creating an environment where developers actively pursue affordable housing. While staff's proposed incentives (density, parking, and fee waivers) are steps in the right direction, their effectiveness is crippled when they are not granted by-right. This would be similar, if not exactly equal, to a waiver request proposed during a Planned Unit Development (PUD) review to provide relief from a specific zoning requirement, which is always entirely up to Council's discretion for approval. For example, making building height increases contingent upon a discretionary vote by City Council introduces unpredictability. Developers operate on strict financial timelines and make decisions based on a reliable outcome; any incentive burdened by political risk or doubt loses its substantive power to direct development decisions.

This dynamic is thoroughly documented in research from UC Berkeley's Turner Center for Housing Innovation. The Turner Center's analysis of inclusionary zoning nationwide demonstrates that private developers are highly sensitive to regulatory uncertainty. When incentives like density or height bonuses require discretionary council approvals rather than being granted by-right, developers treat them as speculative rather than actionable financial offsets. Turner's research emphasizes that effective housing policies rely on predictable, voluntary, and by-right incentive frameworks paired with direct public investment, rather than discretionary mandates that discourage developer participation from the outset.

2. Arbitrary Fee Increases and Unmanaged Cash-In-Lieu Funds

The City lacks a comprehensive strategy or operational structure for deploying and managing cash-in-lieu funds. The proposed fee-in-lieu hike for ownership units, increasing by over 106% to \$19.08/sf, imposes a severe regulatory cost on new construction. Discussions regarding the potential outsourcing the management of

Louisville's IHO funds to the City of Boulder would be highly detrimental to our community's autonomy and local housing efforts. Collecting a substantial amount of cash-in-lieu funds without a clear, locally controlled delivery model creates an idle capital repository rather than actual homes.

Empirical financial modeling from the Turner Center provides a stark warning about the unintended macroeconomic consequences of arbitrary fee hikes. Their research shows that heavy, uncalibrated inclusionary burdens suffer from severe diminishing returns, where fee hikes sharply curtail overall housing production. Crucially, Turner's market-wide modeling revealed that if supply suppression causes market-wide rents to rise by a mere 0.8%, the aggregate financial loss imposed on all renters across the city completely negates the entire economic value of every single below-market-rate unit produced under the inclusionary ordinance. In short, overreaching fees risk damaging overall community affordability far more than the few subsidized units can repair.

3. Financing Complexities and the Exclusion of LIHTC

There is a fundamental misunderstanding regarding how affordable housing is financed. Low-Income Housing Tax Credits (LIHTC, 4% and 9% tax credits) are the primary vehicle for equity in affordable developments. Since the program's inception 40 years ago, LIHTC has catalyzed the development of approximately 3.5 million affordable housing units. However, project scale and mixed-use or mixed-income projects present challenges with leveraging LIHTC.

In the last five years, the Colorado Housing and Finance Authority (CHFA) has awarded LIHTC to over 130 projects, but only three projects with fewer than 30 units have been awarded. Given the overhead and fixed costs associated with LIHTC development, a floor on the size of projects essentially exists at 30 units. Because of the scale of projects in Louisville, it would be nearly impossible to provide affordable housing in a mixed-income development while using the largest and most-proven affordable housing financing tool.

If LIHTC units are within a larger building, they typically need to be in a separate condo, adding costs and complexity. As such, LIHTC equity cannot be effectively leveraged for individual affordable units mandated within market-rate developments under an IHO requirement. Because these mixed-income units cannot access federal tax credit equity, the market-rate units must directly absorb the financial gap. This inflates overall housing costs across the entire development, yielding substantially fewer affordable units than could be achieved by leveraging dedicated affordable housing funding streams.

4. Unexamined Policy Assumptions

City Council and staff appear to be moving forward on the assumption that because peer municipalities (such as Boulder, Broomfield, Lafayette, and Longmont) utilize IHOs, Louisville must adopt one as well. Before codifying these changes, Council must address critical unanswered questions:

- a. *Where is the empirical evidence that IHOs effectively produce meaningful affordable housing in communities of our size?*

- b. Has the City interviewed members of the regional development community to understand what specific zoning tools or frameworks would actually incentivize them to build low- and middle-income housing?*
- c. Does the City fully appreciate the capital stack constraints that IHO mandates impose on private projects?*
- d. Is the City aware of the unit-count threshold where a developer is able to effectively offset the cost of affordable housing units with market rate housing units?*

5. Putting the Cart Before the Horse: Premature Timing Ahead of Zoning Reform

Advancing IHO amendments today preempts the comprehensive development code and zoning reform scheduled to begin in 2026. The primary barrier to affordable housing in Louisville is not the absence of an updated IHO, but rather our exclusionary underlying zoning, which prohibits standard naturally occurring affordable housing typologies (such as duplexes, townhomes, and missing-middle multi-family) across most residential zones. Imposing penalizing fees and mandatory ratios while maintaining restrictive zoning is classic "cart before the horse" policy. Real affordability requires systemic zoning reform, not higher regulatory tolls.

This fundamental economic principle is strongly reinforced by a 2025 study from The Pew Charitable Trusts ("New Housing Slows Rent Growth Most for Older, More Affordable Units"). Pew's nationwide data analysis proves that expanding general housing supply through zoning reform is the single most effective tool for slowing rent growth, benefiting lower-income households most directly. Specifically, Pew found that adding new market-rate supply relieves regional demand pressure and slows rent growth most dramatically for older Class C housing, the primary source of naturally occurring affordable housing, by preventing higher-income households from outbidding local workforce families for existing homes. By prioritizing restrictive IHO fee increases over broad zoning reform, Louisville risks stifling the very housing supply needed to stabilize rents community-wide.

Ordinance Amendment: Like-for-Like Requirement

Currently, Louisville's "Like-for-Like" requirement, which mandates that affordable units be essentially identical in size and type to market-rate units, is unintentionally stifling the production of affordable housing. While the intent is to ensure quality, the practical result is a lack of creative, cost-effective solutions.

The "Like-for-Like" or "Unit Comparability" requirement is a common feature in many housing ordinances intended to prevent substandard housing, but in a high-cost market like Louisville, it often acts as a mathematical barrier. If a developer is building 2,500 sq. ft. luxury townhomes, requiring the affordable units to also be 2,500 sq. ft. "wastes" subsidy that could have been used to create two smaller, high-quality units instead.

We should be prioritizing the number of residents housed over the square footage of the structure. I urge the Council to consider an increased flexibility in unit delivery approach. The current ordinance should be amended to allow for "Functional Equivalence" rather than literal

"Like-for-Like" requirements.

- **Decoupling Size and Type:** If a developer is building luxury townhomes, they should be permitted to fulfill their IH requirement by providing a higher number of smaller units (such as condos or apartments) or Accessory Dwelling Units (ADUs) on-site.
- **Maximizing Subsidy:** It is more beneficial to the community to have two high-quality 800 sq. ft. units than one 1,600 sq. ft. luxury unit that happens to be deed-restricted.
- **Alternative Methods:** Allow for the conversion of existing structures or the inclusion of "tiny homes" and ADUs as valid ways to meet the 12% requirement, provided they meet high-quality design standards.

Ordinance Amendment: Scale of Development & Small-Project Exemption

An additional flaw in Louisville's current Inclusionary Housing Ordinance framework is its "one-size-fits-all" application across varying scales of development. An inclusionary mandate relies on economies of scale; larger multi-family developments with dozens or hundreds of units have the financial capacity, capital stack, and spread of fixed costs necessary to absorb affordable housing mandates or fee structures. Small-scale developments do not.

I urge City Council to amend the ordinance to exempt "small" residential projects of 12 units or fewer from IHO requirements entirely. An alternate suggestion is a 10 unit exemption, however a strong preference is given to a 12 unit exemption. Examples of neighboring IHO exemptions include:

- Superior: Requires on-site units for projects over 10 units; developments with fewer than 10 units are permitted to pay a fee-in-lieu.
- Broomfield: Sets high minimum thresholds, applying requirements only to projects with more than 25 for-sale units or more than 5 rental units.

There are compelling policy, economic, and practical reasons for establishing a 12-unit exemption threshold:

- **Eliminating Mathematical and Operational Friction:** With a 12% affordability requirement, a 12-unit project yields mathematically to 1.44 units, and with a rounding up it yields 2 units. Imposing a single deed-restricted unit, or a fractional fee-in-lieu, onto a 4-, 6-, or 10-unit project creates severe operational friction. Managing long-term deed restrictions, income compliance, and HOA dues splits within a small, single-building cluster or townhome HOA imposes a disproportionate administrative burden on both the property owners and City staff.
- **Incentivizing "Missing Middle" and Small Infill Builders:** Small infill projects, such as duplexes, triplexes, townhomes, and small cottage courts, are typically built by small, local builders rather than institutional developers. These projects are crucial for delivering "missing middle" housing types in established neighborhoods. Subjecting small-scale builders to heavy per-square-foot fees or mandatory on-site restrictions stifles small infill projects before they ever leave the drawing board. I can't emphasize enough how important this point is for the future of housing in Louisville.
- **Preventing Artificial Unit Reductions:** Without a clear exemption threshold, developers facing marginal project economics on small parcels are incentivized to downsize their

plans (for example, reducing a potential 10-unit project to a single-family home) simply to avoid regulatory complexity, resulting in a net loss of potential housing supply for Louisville.

- **Alignment with Regional Best Practices:** Establishing project-size thresholds is common practice among Front Range municipalities. Nearby communities recognize that small-scale infill requires different regulatory treatment; for example, peer cities such as Superior and Longmont set thresholds exempting projects under 10 units from on-site mandates to keep small infill viable, as outlined previously.

Exempting projects of 12 units or fewer ensures that Louisville does not inadvertently penalize local infill builders or block the incremental, missing-middle housing types our community needs as we prepare for broader zoning reform.

Market-to-Affordable Acquisition Program

While Louisville has a robust IH ordinance requiring a 12% affordable housing contribution, the current trend shows that developers frequently opt for the cash-in-lieu payment, as mentioned above, rather than building units on-site. This results in a growing Affordable Housing Fund but a stagnation in the actual delivery of units. In a market where construction costs are high and land is scarce, we cannot rely solely on "ground-up" development to meet our community's needs.

I propose that the City of Louisville establish a formal "Market-to-Affordable" acquisition program. Rather than waiting years for a multi-unit project to be built, the City should utilize existing CIL funds to incrementally purchase existing market-rate inventory (condos, townhomes, and small houses) and convert them into permanently deed-restricted affordable housing. An immediate action for the City to help with this process and with affordable housing in general would be the hiring of a staff member dedicated to exploring funding opportunities and pursuit of housing grants. Supplementing City funds with the Affordable and Attainable Housing Tax dollars and/or through available grant programs with DOLA could be an effective strategy to leverage our funds to go further.

To execute this, the City could establish or partner with a Community Development Corporation (CDC). A CDC model offers several advantages over traditional municipal management:

- **Agility:** A CDC can act quickly in the competitive Louisville real estate market, making offers on properties as they become available.
- **Revolving Fund Management:** As properties are sold to income-qualified residents, the proceeds return to the CDC to fund the next acquisition, creating a sustainable, long-term cycle.
- **Professional Oversight:** CDCs specialize in vetting AMI-qualified residents and managing deed restrictions, ensuring the City's investment is protected for 20+ years.

Why This Works for Louisville

- **Immediate Inventory:** Units can be added to the affordable pool in 30-60 days (market closing time) rather than the 2-4 years required for the planning and building of new construction.

- **Scattered-Site Integration:** This model naturally integrates affordable housing throughout existing neighborhoods, maintaining the unique character of Louisville without the need for large-scale rezoning or high-density concentrations.
- **Cost Efficiency:** While the "subsidy gap" in Louisville is significant, using funds to "buy down" an existing home is often more cost-effective per unit than the "all-in" costs of new land acquisition, infrastructure, and vertical construction.
- **Leveraging Historic Preservation Funding:** Louisville's rich historic structure inventory presents a unique opportunity to stack public capital. By converting market-rate, historically designated or eligible properties into deed-restricted affordable units, the City or CDC can leverage local, state, and federal historic preservation grants and tax credits. This creates dual community value: preserving Louisville's historic architectural fabric while leveraging external preservation dollars to buy down housing acquisition and restoration costs.
- **Leveraging Regional Success:** This model is currently utilized successfully by mountain communities (such as Vail's "InDEED" program) and is being piloted in Boulder. Louisville has the opportunity to lead the Front Range in adapting this model for its Old Town Overlay area and its suburban neighborhoods.

As you deliberate on the IH Ordinance updates, I urge you to:

- **Formalize the "Buy-Down" Pathway:** Explicitly list property acquisition and deed-restriction "buy-downs" as an approved use of the Affordable Housing Trust Fund.
- **Conduct a CDC Feasibility Study:** Evaluate the costs and benefits of forming a Louisville-specific CDC or a sub-entity of the current Housing Authority dedicated to market-to-affordable conversions. At a minimum, hire a staff member to be dedicated to housing.
- **Integrate Historic Preservation Capital as a Win-Win Model:** Coordinate with Louisville's Historic Preservation Commission to explicitly stack preservation grants and incentives into the acquisition and rehabilitation capital stack for historic affordable conversions.
- **Target the "Missing Middle":** Prioritize acquisitions that serve the 60%-100% AMI range to support our local workforce, including teachers, first responders, and municipal employees.

Conclusion & Essential Ordinance Safeguards

Rather than penalizing housing production through an updated fee and a restrictive ordinance framework, Louisville should pause these IHO amendments until our upcoming zoning reform is completed. However, if Council believes it is critical to continue down the path of amending the inclusionary housing ordinance at this time, then we should make it "less bad" by integrating these essential policy elements directly into the language of the code:

1. **Provide True By-Right Incentives:** Shift all proposed incentives, including density, height, and parking adjustments, from discretionary approvals to predictable, by-right entitlements so developers have absolute certainty when designing projects.
2. **Eliminate Like-for-Like Requirements:** Codify flexible "functional equivalence" standards that allow developers to deliver more total units rather than restricting them to identical market-rate sizes and types.

3. **Develop a Published Fund Management Plan:** Establish and publish a clear, locally controlled operational plan for administering and deploying cash-in-lieu funds prior to collecting increased fee amounts.
4. **Exempt Small housing developments of 12 units or less:** Missing Middle housing can supply needed attainable naturally occurring affordable housing outside of the inclusionary zoning structure, and should be encouraged.

Having an actionable plan in place to execute and administer an inclusionary housing ordinance should not be treated as a "next step" to figure out down the road—it must be baked directly into the ordinance itself.

Thank you for your leadership and dedication to the future of Louisville.

Sincerely,

Andy Johnson

Mayor Leh,

Good afternoon. I was just wondering if anyone could assist me with getting in contact with Holocaust Fraudster Philip Weiser and tell him to make his appearance in Freeman V. Griswold, et al. (1:2026cv02233) in federal court? If he's telling the truth about his mother being born in a concentration camp, then he should make his appearance in the case to prove me wrong.

I've been trying to get him to show up for week to no avail! As you can see his campaign email and his government is copied and he still won't make an appearance in the case or communicate directly with me, even though that is literally his job as attorney general. It just doesn't make any sense. Why is his entire office scared of appearing in court against one tiny little self-represented person? It's just pathetic!

Anyone with your city who can reach out to him and ask him to show up in this case would be appreciated! I've attached an excerpt from my suit against him (reformatted and one redaction), however, if you would like to see the full complaint in higher resolution and unredacted, I've even secured a domain link exclusively to forward people to the full complaint: [ProjectRedBeam.com](#). (the complaint also explains the origin of the domain name). I strongly recommend reviewing it because Phil's Holocaust lies are far from the biggest revelation made in the suit.

If someone could please reach out to him and get this loser to show up in court, I would greatly appreciate it!

Thanks!

Sincerely,

Michael S. Freeman II

Regional Leaders and Colleagues,

I am writing to close the loop on this specific thread regarding Rocky Mountain Metropolitan Airport (RMMA) oversight and intergovernmental accountability.

On July 27th, Jefferson County Commissioner Zenzinger publicly committed on this chain to engage and respond upon her return. It has now been over ten days, and no response, operational framework, or policy clarification has been provided.

We now understand internally that Jefferson County leadership has issued a blanket directive advising county officials not to answer constituent or policy inquiries regarding RMMA operations, citing "pending litigation."

While Jefferson County's legal counsel may view complete administrative blackout as a short-term risk management tactic, it places our neighboring communities in an untenable position:

1. **Unilateral Operational Expansion:** Jefferson County continues to sign commercial ground leases, collect airport revenues, and accommodate expanding commercial flight training footprints.
2. **Refusal of Proprietor Oversight:** They simultaneously claim total powerlessness under FAA regulations to manage their commercial real estate leases.
3. **Breakdown of Intergovernmental Dialogue:** They have now closed off basic policy dialogue with the very regional partners whose residents bear 100% of the environmental, noise, and safety impacts of their management decisions.

Intergovernmental relations are built on reciprocity. Jefferson County should not be able to expect seamless regional collaboration on shared infrastructure, planning, and inter-county initiatives while actively weaponizing a legal blackout to inflict unmitigated health and safety impacts on neighboring jurisdictions.

Until Jefferson County demonstrates good-faith engagement—including exercising its explicit authority as an airport proprietor to condition commercial ground leases and establish transparent environmental metrics—neighboring municipalities should re-evaluate all discretionary intergovernmental cooperation with Jefferson County.

If Jefferson County chooses to govern RMMA as an isolated island immune from regional

accountability, our surrounding communities should respond accordingly across all shared policy fronts until meaningful oversight and dialogue are restored.

Thank you for your time, leadership, and continued commitment to our communities on this issue.

Sincerely,

Michael Verdone

Good morning, Commissioner Zenzinger:

When can I expect a response to my letter regarding Jefferson County's rights and responsibilities as an airport sponsor and proprietor?

The County cannot profit from commercial operations on the ground while disclaiming accountability for the resulting noise, safety, and health impacts in the air. In your reply, please address my specific points rather than hiding behind standard procedural steps like the Part 150 study or FAA Grant Assurance #22—which the County routinely uses to disclaim authority over its own leasing and operations. Administrative processes are meaningless to impacted communities unless tied to objectively measurable reductions in ground-level harm.

Finally, as a former Co-Sponsor of HB24-1235 (Reduce Aviation Impacts on Communities), how do you reconcile that legislative record with your current oversight of an airport driving the exact community impacts that legislation was intended to remedy?

I look forward to your direct response.

Thank you,

Michael Verdone

Dear Commissioner Zenzinger,

I have yet to receive a response to my email below regarding Jefferson County's direct responsibility as the owner, landlord, and operator of Rocky Mountain Metropolitan Airport.

Deflecting constituent and neighbor concerns by claiming total preemption abdicates Jefferson County's clear rights and responsibilities as a municipal airport sponsor and proprietor. You cannot profit off the business model on

the ground and then disclaim all responsibility for the health, noise, and safety impacts created in the air.

Please confirm receipt of this follow-up and advise when impacted residents and neighboring jurisdictions can expect a formal response outlining how the Board of County Commissioners intends to exercise its proprietary authority at RMMA to reduce the ongoing and extensive negative impacts of your airport's daily operations.

Kindly,

Michael Verdone

<michaelverdone@gmail.com> wrote:

Dear Commissioner Zenzinger:

I am writing to directly address your recent email exchange with a resident suffering under the operations of Rocky Mountain Metropolitan Airport (pasted below). Specifically, I am writing to call out the fundamental misrepresentations and omissions in your response, a pattern of official deflection that has become standard practice for Jefferson County leadership when my neighbors and I plead for relief from the noise, lead pollution, and safety risks generated by your airport.

You stated that Jefferson County officials are *"not responsible for determining or adjusting the flight path"* and that neither the Board nor county employees have the authority to change them, advising residents to contact the FAA instead. While everyone understands that the FAA governs navigable airspace, invoking federal preemption to claim total helplessness is a complete abdication of Jefferson County's role as the owner and operator of the airport.

The FAA did not create the air traffic density spike at RMMA; **the flight school planes don't just materialize in mid-air. They start on the ground because Jefferson County invited them to be there.** Jefferson County owns the land, leases the hangars, approves the master plans, profits from leaded aviation fuel sales, and contracts with high-volume flight schools. The FAA is forced to clean up your mess once the glut of flight school planes become airborne each day, but claiming that the county is a helpless observer the second an aircraft leaves the tarmac, even though you invited, leased, and incentivized that aircraft to be at RMMA in the first place, is pure gaslighting.

You cannot profit off the business model on the land and then wash your hands of the inevitable public health, noise, and safety impacts created in the air. Jefferson County has direct authority over:

1. **Flight School Leases & Business Contracts:** Establishing operational standards, lease terms, and volume limits for commercial flight training operators on county property. A court may not force you to exercise your power as a proprietor, but basic moral integrity and a commitment to your neighbors should.
2. **Airport Land Use & Growth Strategy:** Aligning RMMA's master plan and noise abatement efforts with actual community capacity rather than unconstrained commercial growth.
3. **AvGas & Environmental Oversight:** Accelerating the transition away from leaded fuel and mitigating toxic exposure for surrounding neighborhoods. Regardless of your public talking points, Jefferson County's effort on leaded fuel is pure theater. When your own RMMA Advisory Board projects that unleaded fuel will cap out at just 20% of total fuel sales, it proves the county isn't serious. If you actually cared about stopping lead exposure in neighboring communities, you would use the airport's profits to aggressively subsidize unleaded fuel until it became the default option for every operator at RMMA.

Telling impacted residents to simply "reach out to the FAA directly" is passing the buck for a noise and lead emissions problem of Jefferson County's own making. I may be alone in this view given your actions, but in Colorado I expect elected leaders to take responsibility for the county assets they manage, rather than attempting to hide behind federal regulations to shield the county's business operations from accountability to constituents and neighbors. The residents of Boulder County, Broomfield County, and Jefferson County deserve so much better.

Kindly,

Michael Verdone

Subject: Re: FW: [EXTERNAL] Flight safety concerns over Superior neighborhoods

Appreciate the follow up again. I also have responses from Rachel Zenzinger, the Jefferson County Commissioner. You can see the response

below which does not address anything. Since the start of the noise study, flights have only increased.

Please talk directly with Jefferson County to address this issue. They truly are doing nothing while they fly over Boulder County, below the minimum altitude and directly over Superior CO and other Boulder County areas. An accident will occur over houses and in my opinion everyone who could have done something to stop this will be accountable. This summer the flights will only increase by 2 to 3 times. Please do what you can to address this issue and change the flight path, limit the flight schools and save our town. This is a safety issue first, then a list of 10 or so other issues next.

Dear Joe,

Thank you for your email and for letting me know about your concerns.

As we have communicated many times, Jefferson County officials are not responsible for determining or adjusting the flight path. The current flight path is set directly by the FAA, and it is not something that the Board of County Commissioners, airport staff, Director Dahl, or any other Jefferson County employee has the authority to change. We have shared your concerns with the FAA, but we have not received any indication that they plan to modify the routes. You may want to consider reaching out to FAA officials directly as well.

Regarding the safety risks you mentioned, my understanding is that those concerns were identified *before* the FAA made recent adjustments to the flight path. The FAA has indicated that these changes were intended to address those very issues, which makes it unlikely that they would revert to the previous routes.

While the county cannot change the flight path itself, we are moving forward on the areas within our control, including the Part 150 Study for the Volunteer Noise Abatement Program and the transition to unleaded fuel. You can find more information about these efforts [HERE \[rmmmapart150study.com\]](http://rmmmapart150study.com).

Thank you again for reaching out.

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe

Dear Council Members,

I've recently read that the City of Boulder is launching a pilot project to remove high-risk junipers from city-owned spaces and replace them with native, low-flammability, wildfire-resilient plants. Does the City of Louisville have any plans to remove junipers from open space areas along the Power-Line trail, specifically in the Meadows at Coal Creek neighborhood located between Dillon Rd and Cherry St? Seems it would be prudent to do so in hopes of protecting homes and reducing wildfire hazards in our community.

I look forward to hearing from you or being directed to a resource that addresses my concerns.

Thank you,

Dear Mayor Leh and City Council,

I can't make tonight's meeting, but I hope you'll support the reprogramming of \$100K for the Fire Smart Louisville project in the Consent Agenda. I've spoken with most of of you about the project and what our plans are going forward if funding is available. We really appreciate City Manager Langley's efforts to identify available funding for this effort and Council's support for this new voluntary mitigation program.

And FYI, I presented on Fire Smart Louisville to the LFPD Board last night and asked them to officially sponsor the program along with the City, and provide other technical and financial support going forward. I've attached a PDF of my presentation for your reference.

Thank you in advance for your support!

Good morning, Commissioner Zenzinger:

When can I expect a response to my letter regarding Jefferson County's rights and responsibilities as an airport sponsor and proprietor?

The County cannot profit from commercial operations on the ground while disclaiming accountability for the resulting noise, safety, and health impacts in the air. In your reply, please address my specific points rather than hiding behind standard procedural steps like the Part 150 study or FAA Grant Assurance #22—which the County routinely uses to disclaim authority over its own leasing and operations. Administrative processes are meaningless to impacted communities unless tied to objectively measurable reductions in ground-level harm.

Finally, as a former Co-Sponsor of HB24-1235 (Reduce Aviation Impacts on Communities), how do you reconcile that legislative record with your current oversight of an airport driving the exact community impacts that legislation was intended to remedy?

I look forward to your direct response.

Thank you,

Michael Verdone

<michaelverdone@gmail.com> wrote:

Dear Commissioner Zenzinger:

I am writing to directly address your recent email exchange with a resident suffering under the operations of Rocky Mountain Metropolitan Airport (pasted below). Specifically, I am writing to call out the fundamental misrepresentations and omissions in your response, a pattern of official deflection that has become standard practice for Jefferson County leadership when my neighbors and I plead for relief from the noise, lead pollution, and safety risks generated by your airport.

You stated that Jefferson County officials are *"not responsible for determining or adjusting the flight path"* and that neither the Board nor county employees have the authority to change them, advising residents to contact the FAA instead. While everyone understands that the FAA governs navigable airspace, invoking federal preemption to claim total helplessness is a complete abdication of Jefferson County's role as the owner and operator of the airport.

The FAA did not create the air traffic density spike at RMMA; **the flight school planes don't just materialize in mid-air. They start on the ground because Jefferson County invited them to be there.** Jefferson County owns the land, leases the hangars, approves the master plans, profits from leaded aviation fuel sales, and contracts with high-volume flight schools. The FAA is forced to clean up your mess once the glut of flight school planes become airborne each day, but claiming that the county is a helpless observer the second an aircraft leaves the tarmac, even though you invited, leased, and incentivized that aircraft to be at RMMA in the first place, is pure gaslighting.

You cannot profit off the business model on the land and then wash your hands of the inevitable public health, noise, and safety impacts created in the air. Jefferson County has direct authority over:

1. **Flight School Leases & Business Contracts:** Establishing operational standards, lease terms, and volume limits for commercial flight training operators on county property. A court may not force you to exercise your power as a proprietor, but basic moral integrity and a commitment to your neighbors should.

2. **Airport Land Use & Growth Strategy:** Aligning RMMA's master plan and noise abatement efforts with actual community capacity rather than unconstrained commercial growth.
3. **AvGas & Environmental Oversight:** Accelerating the transition away from leaded fuel and mitigating toxic exposure for surrounding neighborhoods. Regardless of your public talking points, Jefferson County's effort on leaded fuel is pure theater. When your own RMMA Advisory Board projects that unleaded fuel will cap out at just 20% of total fuel sales, it proves the county isn't serious. If you actually cared about stopping lead exposure in neighboring communities, you would use the airport's profits to aggressively subsidize unleaded fuel until it became the default option for every operator at RMMA.

Telling impacted residents to simply "reach out to the FAA directly" is passing the buck for a noise and lead emissions problem of Jefferson County's own making. I may be alone in this view given your actions, but in Colorado I expect elected leaders to take responsibility for the county assets they manage, rather than attempting to hide behind federal regulations to shield the county's business operations from accountability to constituents and neighbors. Subject: concerned about bike theft/vandalism at McCaslin Park and Ride in Louisville
Date: Tuesday, August 4, 2026 12:31:34 AM

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe

I'm not sure what else I can do about this situation besides asking city council and our RTD Director and the police department for ideas. I will send a copy of this email to to Rafael Gutierrez as well.

On July 6, 2025, our 15-year-old son Cedar locked his bike on the Louisville side of the McCaslin Park and Ride, took the bus to the Rockies game, and came back to find his lock had been cut and his bike was gone. We filed a report with the Louisville Police Department. It seemed that since there were cameras in the area it might be possible to identify a suspect. Cedar also applied for a key card to be able to lock his bike in the bike shed at the Park and Ride. The investigation didn't go anywhere, and Cedar has been locking his bike in the shed. Tonight he and his friend came back from another Rockies game to find both of their bikes damaged within the shed. Cedar's bike chain and some of his eBike wiring had been cut. His friend's eBike also had wiring cut, and the screen was stolen. Both bikes remained locked in the shed.

We filed another police report, with the same responding officer from last year.

Cedar contributed about half the cost toward this replacement bike that has now been damaged, money he earned from his dogwalking job. It's hard to answer his questions about what else he's supposed to do to try to protect his property. I asked the responding officer if there are a lot of vehicle breakins at this location and he said no, it seems to just be confined to bikes. Since the bikes were damaged within the shed, we thought that there might be a record of who swiped their key card then, but the officer explained that's not the case, they just unlock the shed without documenting who used it.

Cedar just turned 16, and while he has a driver's license he does not own a car. There are 4 drivers in our family and 2 vehicles. It seems like the main suggestion is to not leave bikes at the Park and Ride. That feels disappointing since RTD has invested in the shed, the key card system, and a camera that appears to look directly into the shed. We live near the DASH line, but the 228 along McCaslin stops running by 9pm. Aside from biking to McCaslin, it seems his main option might be to take the DASH into Boulder and get the FF1 at Table Mesa, if he doesn't want his bike to be stolen or damaged again. Or we drop him off and pick him up.

I understand this may seem trivial to you, given the other serious concerns you deal with. But it's hard to just tell my kid "tough break" when the vehicle he DOES own, that gives him autonomy, has now been taken or damaged twice in the last 13 months at the same location. Thanks for any advice about how he should get to the next Rockies game.

Thank you for your service to our community,
Erin Robertson

Mayor Leh and City Council,

Would it be possible to get an update on the potential work the City is doing to support community safety related to e-moto / e-bike use? (Please see historical email traffic for additional detail / context related to this request.)

All the best,

Allison

On Tue, Jun 16, 2026 at 10:11 AM Allison Johanson <johanson.allison@gmail.com> wrote:
Mayor Leh and City Council,

I wanted to circle back in on this dynamic topic... Would it be possible to get an update on potential work the City is doing to support community safety related to e-moto / e-bike use?

Notably, it is worth sharing that the following instances have all occurred since May where I've been on bike rides / runs on Coal Creek Trail, walking in our Louisville neighborhood, or sitting at my family's dining room table.

- Three middle school youth were riding down Jefferson Ave on *one* e-bike, and the third passenger who was not wearing a helmet, fell off of the bike into the road. Both my husband and I helped the girls and shared our concern for their safety (note: only the "driver" was wearing a helmet and at least two of them were distracted by their phones when they crashed).
- A group of three youth were riding wheelies on their individual e-motos up Hutchinson St. towards the LES parking lot, when one youth dumped his e-moto as a vehicle was driving in the road behind him.
- While running on Coal Creek Trail between South Roosevelt Ave. and Dillon Road, I've encountered e-motos traveling well over 15 mph, at least weekly.
- This weekend, when commuting home on Coal Creek Trail from a mountain bike ride on Boulder OSMP trails, two elementary or middle school aged youth were riding on one e-bike took a curve wide. These youth rode onto the *wrong* side of the trail, directly into my husband and me as we rode single file

on the right side of the trail. We were able to narrowly avoid crashing into these two youth, who had a complete lack of awareness of riding etiquette or control over the e-bike's weight / speed.

- Multiple times per week youth on e-motos / e-bikes run the stop sign at Jefferson Ave. and Pine St. While sitting at our dining room table, it is not uncommon to hear cars honking, watch cars stop abruptly, or even swerve to keep from hitting a child on an e-moto or e-bike.

As we wait for the state to catch-up with regulations related to this topic, I'm hopeful that our local government would be able to take on establishing local policies to act in the best interest of our community. Below are a handful of references for review and consideration:

Colorado Resources

[Douglas County Draft / Proposed Ordinance : Regulations for e-scooters and off highway vehicles](#)

This new draft ordinance provides a compelling example of how communities can lead in the development of necessary regulations for these e-vehicles.

[Children's Hospital Colorado: E-Bike Article](#)

This article from May 2026 overviews the data related to injuries associated with e-bikes and electric scooters. This publication noted a 184% increase in traumatic injuries related to e-bikes between 2024 - 2025 that were seen at Anschutz. (At least one of these recorded injuries in 2025 could have included a Louisville resident: in October 2025 a Louisville youth hit a car while riding their e-moto down Pine late at night, broke two bones in their leg, and then spent time admitted at Children's hospital managing complications from the accident). A quote from this article is included below that calls for the development of laws related to these e-vehicles:

"As our experts mentioned, the laws and regulations have not caught up with the speed at which e-bikes and e-scooters have hit the streets. While there are some pieces of legislation currently under review for e-bikes, our experts believe there is more that needs to be defined and passed into law regarding safety and e-bikes and e-scooters."

Marin County California Resources

[E-Bike Safety Rules, Sparked by Marin's Work, Introduced to Congress](#)

March 2026 article from Marin County

[E-Bike Laws to Know](#)

Marin County Laws

[Overview of the Special Committee formed to develop Marin's e-bike regulations](#)

[Marin County e-bike related articles](#)

This search on the Marin County website contains all of the above linked resources, as well as countless others (ex. letters from County Commissioners, Public Health Officials, and special comments / data that have been routed to California State Officials).

Again, I respectfully request follow-up on what (if any) action is being or could be taken by

the City, and I sincerely appreciate any time and attention Louisville City Council may be able to devote to this topic.

All the best,

Allison

On Fri, Aug 15, 2025 at 7:13 PM Allison Johanson <johanson.allison@gmail.com> wrote:
Josh / City Council,

I appreciate the follow-up and the discussion related to this topic at the August 5th council meeting.

For additional reference, I have *never* encountered more e-motos on a single outing than this morning. I also acknowledge the timeframe I was running occurred during the high school commute. However, I believe this highlights the necessity for our community's leaders to review this broader topic in detail, as noted by Caleb's comments during the August 5th council meeting.

On a run that connected Old Town to Coal Creek Trail to Powerline Trail, I was passed by *6 e-motos within a ~1.5 mile section* of my route. Motorcycles don't belong on trails - for the safety of both the traditional trail user and the youth riding a motorcycle illegally. References attached.

Respectfully,

Allison

On Thu, Jul 31, 2025 at 3:51 PM Josh Cooperman <jcooperman@louisvilleco.gov> wrote:
Dear Allison,

Thanks for your observations and suggestions.

As you presumably know, City Council will consider instituting a 15 mph speed limit for all bicycles on City trails and paths at our meeting on 5 August. This proposed ordinance arose from two discussions about bicycle safety and electric bicycles in which City Council engaged last year (before I was elected). Such a speed limit will likely do little to address residents' concerns about electric bicycles, and I am not yet sure whether I will support adoption of this speed limit.

At next Tuesday's meeting I expect City Council to concentrate on the proposed ordinance, but our conversation may stray into the host of issues surrounding electric

bicycles. You are very welcome to provide further comments at the meeting. I hope that City Council will find another opportunity in the near future to discuss electric bicycles; more feedback from residents would increase the likelihood of such a discussion. I also hope that the State legislature will consider further regulations during its upcoming session.

After those two discussions last year the Police Department did step up education and enforcement of electric bicycle usage along the lines that you recommend. Some of this work has been in coordination with Louisville Middle School. I do not know how effective this work has proven so far.

Please continue to share your thoughts, questions, and concerns.

Best,
Josh

Subject: Ordinance 1899 (Series 2025) Follow-up: Bike / E-bike Speed Limits and Regulations

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Mayor Leh and City Council,

After listening to the July 8th City Council meeting, where bike speed limits on parks and open space paths were discussed as part of Ordinance 1899 (Series 2025), I wanted to reach out to provide feedback and comments.

For your awareness and background, each year I run / mountain bike 2000+ miles. The vast majority of these miles start in Old Town Louisville and use Coal Creek Trail to connect to the trail systems in Superior and Boulder County. These miles and subsequent hours have provided me with an incredible opportunity to observe and

experience many elements that relate to Ordinance 1899 and bike / e-bike / e-moto use in Louisville.

Below are observations I have made within the last year or two related to bikes, and more specifically e-bikes / e-motos:

- E-bike traffic has increased exponentially. Specifically, youth on varying classes of e-bikes.
- The number of class 3 e-bikes and e-motos riding on sidewalks, multi-use paths (ex. Powerline Path), and trails (ex. Coal Creek Trail) is *excessive*. Additionally, the majority of these riders appear to be under the required legal licensing age to ride these e-bikes / e-motos at all.
- Since e-bike / e-moto traffic has increased, the number of close calls I have experienced as a runner or experienced rider have also increased exponentially. Examples of close calls I've had include youth riding in the left "lane" of Coal Creek Trail when cornering (often in blind curves), youth riding with multiple passengers while the primary rider is distracted by their cell phone, large groups of young riders riding recklessly, or bikes simply not be cognizant of rules of the road (ex. riding on the left side of the road, failing to slow at intersections to use the "Safety Stop Law").
- Youth gather at LMS, racing their e-bikes / e-motos around the LMS track (I observed this as recently as July 21st, when I drove by at 9:20PM).
- Trail damage on Coal Creek Trail from "donuts" and "wheelies" continues to increase.
- There are certainly non-powered bikes that ride over 15 mph; however, I do not recall specific incidents with these riders.
- Related to the close calls and concerns I've had related to e-bike / e-moto usage it has been primarily with youth, not adults.

As our leaders look at ways to improve the quality of life and safety in our community, related to bike / e-bike / e-moto usage, I sincerely believe it will require the enforcement of [current requirements](#), first. If it is possible to cite (and educate) youth 10 and over / parents of these youth for the primary infraction of riding a bike that is not classed for the surface or their age, we will make the most significant, positive impact in Louisville.

Speed is a contributing factor to the concerns many people in our community have related to bike / e-bike / e-moto use. There may certainly be benefits to Louisville having recommended speeds like [Boulder](#) or other neighboring communities. However, these speed recommendations will not ensure riders stay on the correct side of a road / trail / path, it doesn't ensure inexperienced 10 - 15 year olds know how to handle a vehicle going 15+ mph within 10' of other users, and it doesn't ensure e-bikes / e-motos meant for solely road use by ages 16+ are kept on the road.

I respectfully ask that you consider this honest feedback as you make future recommendations and guide City Staff. If you have follow-up questions, please don't hesitate to reach out.

All the best,

Allison

Dear City Council Members,

I'm writing to urge the city to review the cybersecurity of our water and wastewater systems following the US Cybersecurity Infrastructure and Security Agency's (CISA) July 30 warning about increased attacks targeting the operational technology and programmable logic controllers used by water utilities.

CISA's post here:

<https://www.cisa.gov/news-events/alerts/2026/07/30/cisa-urges-water-and-wastewater-systems-sector-protect-ot-against-activity-targeting-plcs>

Recent incidents have disrupted water operations in multiple states, including loss of pressure, flooding, and systems being forced into manual operation. I hope the city will review our systems, and ensure they will be assessed against CISA's latest guidance, particularly regarding internet-exposed equipment and remote access.

Please consider asking the appropriate city staff to brief the council and community on the steps being taken to protect this essential infrastructure.

Thank you for your attention to this important issue.

Sincerely,

Susan

Last Bit of Summer!

August is here and the downtown summer is winding down, so don't miss the last Street Faire in the 2026 line-up, come out for First Friday, hit up the end of season sales at the shops, enjoy the summer bounty at the Farmers Market, savor the seasonal dishes at our restaurants, and try local beers at Pints in the Park. There's plenty left to do downtown before the summer ends!

STREET FAIRE

Join us for the last Street Faire of the season with The Dirty Turkeys!

The Louisville Downtown Business Association in partnership with the City of Louisville is proud to present this year's fantastic Street Faire Line-up!

Fridays this Summer in Downtown Louisville

The Street Faire runs 5:30–9:00pm. Music is 6:30 to 9:00 — rain or shine.

The Street Faire is at the Steinbaugh Pavilion, 824 Front Street.

There is excellent food, cold drinks, lots of children's activities, quality arts, crafts, sundries, and, because of our awesome sponsors, this event is FREE!

Pints in the Park!

August 29th, 2-6pm

Community Park

Pints in the Park returns August 29th, 2–6pm (priority ticket holders enter at 1pm)!

Sample more than 150 pours from Colorado's breweries, cideries, wineries, distilleries, and creative beverage makers — including several exciting newcomers making their Pints in the Park debut. Enjoy live music all afternoon, incredible local food, artisan vendors, and non-sampling tickets for designated drivers and anyone who just wants to soak up the atmosphere. Sip, savor, and celebrate downtown!

Grab your tickets on [Eventbrite](#).

And we'd love your help pulling it off - volunteer for part of the time, and enjoy the rest of the festival for free! Volunteering is in 2-hour increments. You may sign up for one or several time slots. Volunteers make this event possible so thank you! Sign up here to volunteer: [VOLUNTEER](#)

Labor Day Weekend Events!

Labor Day Weekend Senior Dinner

Friday, September 4, 2026, 5 pm - 7 pm

Steinbaugh Pavilion, 824 Front St.

The City of Louisville kicks off our Labor Day Weekend celebrations with one of our dearest Louisville traditions, Senior Dinner! This dinner is hosted in recognition of Louisville's seniors, who give so much throughout the year to make Louisville a special place to live and work. The evening will include live music, door prizes, and a chicken dinner with all of the trimmings. This event is FREE for Louisville residents ages 60+. No RSVP is required. If you are interested in volunteering to serve at Senior Dinner, please reach out to the City's Arts & Events Program Manager at ibelensky@louisvilleco.gov.

Labor Day Parade

Monday, September 7th

Children's Pet Parade at 9am, Labor Day Parade at 10am

Downtown Louisville

The City of Louisville's annual Labor Day Parade is our biggest event of the year and the only Labor Day Parade hosted in Boulder County! On this magical morning, we come together to celebrate the contributions of Labor and all of the other groups that make our thriving community unique. We will have marching bands, dance troupes, local labor unions, equestrians, and much more. Come on and join the fun! The Parade begins on the corner of E Lafayette and Main St and disperses on the intersection of Rex St. and Main St.

A promotional graphic for Sweet Cow Peach Sorbet. At the top, the words "SWEET COW" are on the left and "COMING IN AUGUST" are on the right, both in a green, sans-serif font. In the center is a large, stylized peach with two green leaves. Below the peach, the words "PEACH SORBET" are written in a large, bold, orange font. A thin green horizontal line separates this from a quote below: "AN APPLE IS AN EXCELLENT THING -- UNTIL YOU HAVE TRIED A PEACH." in green. Underneath the quote is the attribution "-GEORGE DU MAURIER" in green. To the right of the attribution is the Sweet Cow logo, which features a blue cow head with a single horn and the words "SWEET COW" in blue. The entire graphic has a light cream background with small orange star-like shapes.

Sweet Cow

It's Peach Season!

RELAUNCH PARTY

New owners. Old friends. Cold beer. Let's go.

Meet Don & Matt
Rotating Beer Discounts
Special Beer Tappings

1150 Pine St Louisville CO

Gravity Brewing

Under New Ownership!

1150 Pine St.

Come meet our NEW owners!

Louisville's oldest brewery has new owners! Matt Gorbsky and Don Brown took over on July 1st and have been busy since: new events on the calendar, a freshened-up taproom and beer garden, and new beers on the way.

What's happening in August:

- Bike Night, Friday, Aug 7th, 6-9pm. Show off your bike, pedal or powered, in our parking lot. Park with us for Street Faire.
- Re-Launch Party, Saturday, Aug 8th, 12-6pm. Rotating beer discounts, special tapings, and a chance to say hi to Don and Matt. (Our big anniversary party with live music is Sept 12th.)
- Battles & Brews, Tuesday, Aug 25th, 5:30-9pm. Tabletop D&D night with professional Game Masters. Free to play, and July sold out, so register early at battlesnbrews.com.
- Trivia every Wednesday at 6:30pm with Geeks Who Drink.

New menu items from Double D's land this month too!

Check us out at www.thegravitybrewing.com

Punch Buggy Shave Ice

Where to Find Punch Trucky!

640 Main St. C

Hi friends! The sun's still shining and our shave ice truck is still rolling. Here's where you can find **Punch Trucky** in the coming weeks — come say hi and cool off with us! 🌈

August 1: Colorado Day Bazaar, Denver

August 7: Louisville Street Faire, Louisville

August 8: Lafayette Peach Festival, Lafayette

August 9: La Festa, Louisville

August 22: Boulder Taco Fest, Boulder

🇺🇸 Our truck will be hitting the streets and **bookable through September!** Want us at your event or community gathering? Just **let us know** — or fill out our event inquiry form at www.punchbuggyshaveice.com.

 Heads up: our shops will be open through the **end of September** — however, we'll be rolling back our hours during the week when school starts back up again. Follow us on Instagram [@punchbuggyshaveice](#) to stay in the loop!

A decorative graphic for a Poker Night event. At the top, five icons represent themes: a cowboy hat (Yellowstone), a classic car (Scarface), a vintage car (Great Gatsby), a flat cap (Peaky Blinders), and a bow tie (Monte Carlo). Below these, the text 'YELLOWSTONE • SCARFACE • GREAT GATSBY • PEAKY BLINDERS • MONTE CARLO' is displayed. The main title 'POKER NIGHT' is in large, bold, serif font, flanked by stars. Below it, the phrase '/pôr/wine house' is written in a script font. Underneath, 'THURSDAYS • ROTATING THEMES • BEGINNER-FRIENDLY' is printed. The graphic is divided into two columns. The left column, titled 'COMPLIMENTARY POKER', describes a relaxed social card night with no buy-in, no wagering, and dealer-hosted games, featuring illustrations of playing cards (Ace of Spades and Ace of Hearts), poker chips, and dice. The right column, titled 'VIP RESERVED EXPERIENCE', lists a \$30 per guest fee that includes reserved seating, a featured cocktail, a curated grazing experience, and dedicated service. Below this, 'LATE NIGHT HAPPY HOUR' is advertised for Thursdays from 8:00 PM to 11 PM. At the bottom, the text 'THURSDAYS • ROTATING THEMES • BEGINNER-FRIENDLY' is repeated, followed by a row of playing card symbols (diamond, spade, heart, club).

Lyons Gaddis Attorneys & Counselors

Problems Solved

950 Spruce Street, Unit 1B

Risk never takes a day off so it's important to manage it. At Lyons Gaddis, we protect what matters most to you. Because legal challenges can seem overwhelming, we work hard to solve them effectively and efficiently by keeping them simple. That means guiding you through even the most complex issues with plain speak instead of legal speak. We specialize in business law, estate planning, family law, civil litigation, personal injury, real estate, land use and zoning matters, special district representation, school district representation, water law, and more. While we can't predict the future, we can help you prepare for it.

From the Louisville Public Library

ALL IN LOUISVILLE

A COMMUNITY-POWERED VISION FOR CULTURE, LEARNING, AND BELONGING

*Help Shape the Future
of Cultural Services in Louisville*

Louisville Cultural Services is developing a new **Strategic Plan**, and we want **your voice in the process**. The plan will guide the future of the Louisville Public Library, the Louisville Historical Museum, and the city's arts, culture, and

community events.

Whether you check out books, explore local history, attend a concert or festival, or simply value what these spaces bring to our community, your perspective matters. Share your ideas, priorities, and hopes for the programs, services, and experiences you'd like to see in the years ahead. Your input will help us grow, preserve what makes Louisville special, and support creativity and connection across the city.

Take the survey at [Engage Louisville](#), or pick up a paper copy at the Library, Museum, or any City event through the end of August. Your voice matters—thank you for helping shape what comes next.

Join us for an Open House:

Monday, August 3

6:00-7:30 PM

Louisville Public Library (951 Spruce Street, Louisville)

Tuesday, August 11

6:00-7:30 PM

Superior Civic Space (2250 Main Street, Superior)

Thursday, August 13

10:00-11:30 AM

Louisville Recreation Center (900 Via Appia Way, Louisville)

Crown Room

Saturday, August 15

10:00 AM - 12:00 PM

Louisville Public Library - 951 Spruce Street

Service Update for Early August: Library Closure

On August 3 and 4, our servers will be moving to their new home. During this time, library services—including printing, catalog searches, checking out and returning, in-building internet access, and our digital collections—will be temporarily unavailable.

To make the most of this brief disruption, we'll also be closed to the public for both days so our team can tidy up after a bustling summer and get everything ready for the start of the school year. We expect all library services to be restored by the end of the day on August 4. If you need us during the closure, you can still reach us by phone at 303-335-4849. Thanks for your patience and for being such a wonderful part of our library community.

Celebrate 20 Years of the Louisville Public Library!

August 7th 12-2:00pm

Library - 951 Spruce Street

Join us for an open house as we mark two decades of the Louisville Public Library. Stop by to enjoy cake and cookies, make a craft with the kids, and help us celebrate everything the Library has meant to our community. No registration required. Drop in anytime during the event. We hope to see you there!

From the Louisville History Museum

Colorado Day

Saturday, August 1st 11am – 2pm

1001 Main Street

Step back in time and celebrate Colorado Day at the Museum!

The Blue Parrot will be returning to Louisville during the event as a food truck - The Blue Parrot on Wheels! Enjoy old Louisville traditions like pizzelles, Italian games, and a slipper kicking contest. Watch historic actors perform throughout the Museum campus and meet the characters between showtimes.

First Friday: Moments That Made Us

Friday, August 7th 6-8 p.m.

1001 Main Street

Throughout 2026, the Museum will be exploring the founding values of our nation in recognition of the US 250/CO 150 anniversary celebrations. Join us at this First Friday to learn about the moments that made Louisville and Colorado! Create a state flag craft, make a US 250/ CO 150 events passport, and learn the meaning of the word Sesquicentennial!

[Learn more.](#)

History Happy Hour: The Corrupt State Election of 1904

Tuesday, August 11th 5:30 – 7pm

The Simon, 957 Main St

David Hosansky will present on the controversial 1904 gubernatorial election in Colorado and ensuing First Amendment court case. Historians consider the election the most corrupt in Colorado state history, and Colorado

had three different governors in a single day! Join us at The Simon to learn all about this fascinating moment in the state's political history. Registration is requested at LouisvilleCO.Gov/MuseumEvents.

[Register here for August.](#)

Tidbits

Historic Property

LaSalle-DeSantis House

1045 Front Street

The LaSalle-DeSantis house is located in the Caledonia Place subdivision. It was owned by the same family for 114 years and was woman-owned for a majority of

this time. The lot was originally purchased by Mary Cummings, who built this house circa 1905. She sold the home to Pasque Recchione in 1906, who then sold it in 1909 to Bias “William” and Congetta “Jenny” Scarano. By 1910, according to the Census, their daughter Rose and her husband Michael LaSalle were living at this address with their six children. In 1917, the Scaranos deeded this home to the LaSalle family. The LaSalle’s daughter Adeline and her husband Luigi “Tony” DeSantis, who worked as a miner in various Colorado mines, moved back to Louisville in 1935 with their six children. They lived with Michael LaSalle, as Rose LaSalle had passed away in 1928. Tony was tragically killed in the Monarch Mine explosion January 20, 1936 and Adeline worked in restaurants and food service to support her family until she retired in 1965 at age 62. She was very active in the community and never remarried. In 1982, Adeline deeded the property to her daughter Dorris DeSantis Winslow, who became sole owner after Adeline died in 1986 at the age of 82. Dorris worked at Russel Stover for 12 years and then at Boulder Valley School District for 17 years until she retired. The home was sold to Jessica Ann and Jeremy Bronson in 2023.

Hi - I'm a home owner living near the corner of Griffith and Cannon.

I wanted to share this photo of the current, typical parking situation on Cannon along the existing DELO townhome development. I hope the parking and overall traffic and safety issues (I've written about in several previous emails to the city, see attachments) will be taken into consideration.

We have no where near the number of units on the west side of Cannon that are proposed for the east side of Cannon's development. Where will all the residents be able to park on this narrow and already crowded street?

Thank you for your time and thoughtful consideration,

Subject: Coal Creek Village Development
To: <CityCouncil@louisvilleco.gov>, <Planning@louisvilleco.gov>

Hi - I have been emailing the Louisville City Council since 2020 about safety concerns on Griffith St. and Cannon St., adjacent to Little Italy, and near the proposed Coal Creek Village Development. (see attached)

Since that time I have communicated with the city or council off and on about replacing our damaged crosswalk signs due to being struck by vehicles. I can hear each time the signs are struck as it sounds like a gunshot when it is struck and then the cars just speed off on their way.

As of a few months ago, the crosswalk sign was yet again struck by a vehicle but this time the crosswalk sign was never replaced.

Keep in mind this is an intersection that many Louisville Middle School kids use when walking, and riding bikes and ebikes, from Ziggis Coffee Shop to school.

I think since the original crosswalk sign was placed around 2020 it has been replaced about 5 or 6 times due to damage from being struck by vehicles.

This intersection is tight and again a main route for Louisville Middle School pedestrians, e-bikes, and cyclists as well as neighborhood activity.

The city is already adding significant traffic from the upcoming East Louisville DELO development to this area and Griffith St. will be severely impacted.

Please consider how adding additional density as proposed in the Coal Creek Village development is going to negatively impact our safety and quality of life here on Griffith St.

Thank you for your consideration,
Rita Zamora

Solutions

Up to Speed

Setting the pace for the northwest metro region.

TOP STORIES

 [Advocate](#): 2026 Legislative Session, RTD September Service Change

 [Innovate](#): Regional E-Bike Share Program Launch

 [Educate](#): Learn More About CoCo

 [Ride](#): Bike-n-Ride Participation is Growing

 [Be in the Know](#): 10th Annual Sustainable Transportation Summit, New Member Announcement, New Team Member Announcement, We're Hiring!

EXECUTIVE DIRECTOR MESSAGE

Hello, Commuting Solutions members and supporters!

This is an exciting time for transportation across Colorado and here in the northwest metro region. Important decisions are underway at the state, regional, and local levels that will shape how people move through our communities and how we invest in the future.

As we prepare for the [10th Annual Sustainable Transportation Summit](#) this August, I'm especially encouraged by the conversations taking place around funding, mobility, regional coordination, and transportation innovation. Bringing together transportation leaders from across the state is more important than ever as communities navigate limited resources and growing transportation needs.

We're also seeing continued momentum for passenger rail. [Colorado Connector](#) (CoCo) recently launched its public-facing brand, and the Front Range Passenger Rail District Board is expected to decide in late August whether to advance a November ballot measure supporting the project. Commuting Solutions is proud to serve as a public engagement partner, helping residents stay informed and understand what future rail service could mean for our region.

Closer to home, we remain engaged in supporting [Route 228](#) through community outreach and ridership awareness efforts, while also helping communicate updates related to heat-related buckling issues along the US 36 Bikeway.

Transportation funding will remain a key issue this fall as [Initiative 175](#) heads to the statewide ballot. While the measure would provide additional funding for roads, we continue to monitor its potential impact on investments in transit, passenger rail, bicycle, pedestrian, and other multimodal transportation options.

Thank you for your continued partnership and support as we work together to advance mobility, connectivity, and transportation choice throughout our region.

With gratitude,
~Audrey DeBarros

Commuting Solutions

ADVOCATE

2026 Legislative Session Summary

The 2026 Colorado legislative session concluded amid ongoing fiscal pressure, limiting the state's ability to make significant new investments. As a result, much of the session focused on targeted policy changes rather than major funding expansions. Our lobby team tracked 18 bills and actively engaged on 9 bills on behalf of the Northwest Mayors & Commissioners Coalition.

One transportation issue receiving growing attention is Initiative 175, which is expected to appear on the 2026 statewide ballot. If approved, the measure would require revenue generated from motor vehicle-related sources, including fuel taxes, registration fees, and certain vehicle sales taxes, to be used exclusively for roads and bridges beginning in 2027.

Supporters believe the proposal would create a more reliable funding source for roadway maintenance, safety improvements, and highway infrastructure projects. The measure is projected to direct more than \$1 billion annually toward road transportation uses.

Opponents, including Commuting Solutions, are concerned the measure could significantly limit the state's flexibility to invest in multimodal transportation solutions such as transit, passenger rail, bicycle infrastructure, pedestrian improvements, and programs that help reduce congestion and improve mobility options. As Colorado continues to grow, maintaining a balanced transportation system that supports all travel modes remains a key priority for many transportation stakeholders.

[Learn More About Initiative 175](#)

RTD Board Approves Continued Route 228 Service

On July 28, the RTD Board approved the September 2026 Service Change package, including a decision to continue Route 228 service as it currently operates. The outcome follows significant public outreach and feedback from local governments, community organizations, employers, and residents who highlighted the route's importance to mobility, access to services, and regional connectivity.

Commuting Solutions worked closely with the City of Lafayette, Town of Superior, City of Louisville, and the City and County of Broomfield to advocate for the continuation of Route 228. We are grateful for the collaboration of these local partners, whose efforts helped amplify community voices throughout the process.

While this is positive news for the communities served by Route 228, RTD continues to face long-term budget challenges. Commuting Solutions will continue working with our partners and stakeholders as discussions move forward and will keep the community informed as updates and next steps become available regarding the future of Route 228.

INNOVATE

Regional E-Bike Share Program Expanding This Summer

The Regional E-Bike Share Program is moving from planning to implementation. Longmont will host a Media Event and Welcome Ride on August 12 at 10 a.m. at the 8th Avenue and Coffman Street RTD Park-n-Ride, marking a major milestone for regional mobility.

Superior and Westminster are also expected to roll out their e-bike share programs in the coming weeks, bringing the region one step closer to a connected network of shared e-bikes and docking stations.

EDUCATE

Building Momentum for Intercity Passenger Rail in Northwest Metro Region

Momentum continues to build for Colorado Connector (CoCo), the proposed intercity passenger rail service planned to connect communities along Colorado's Front Range. The project would provide a new transportation option linking communities from Fort Collins to Pueblo, improving regional mobility and offering an alternative to driving.

The Front Range Passenger Rail District is currently hosting town halls throughout the corridor to answer questions and provide project updates. As a public engagement partner, Commuting Solutions is connecting residents, businesses, and community leaders with information about the project and opportunities to learn more, ask questions, and share feedback as planning efforts move forward.

[Learn more about CoCo](#)

[Register for a Town Hall](#)

RIDE

Bike-n-Ride Shelter Participation is Growing

Our second quarter report was just released for our [Bike-n-Ride Shelters](#). We had 42 new applicants for the Broomfield and Westminster Bike-n-Ride shelters, which is a 14% increase over Q2 of last year. We're also seeing continued growth in commuters choosing to use this service as part of their daily commute.

Most new users report discovering the shelters by seeing them firsthand, while 16% said they signed up after attending events hosted by Commuting Solutions.

With a bike theft rate of only 0.01%, Bike-n-Ride Shelters offer commuters peace of mind and a secure option for storing their bikes while riding public transit. By reducing concerns about theft, the program makes it easier and more appealing for people to choose biking as part of their daily commute.

Commuting Solutions Welcomes New Members

Welcome, Front Range Community College! We are excited to have FRCC join [Commuting Solutions](#) as a new member and we look forward to collaborating on initiatives that make commuting easier, more sustainable, and more accessible.

New Commuting Solutions Team Members

[Commuting Solutions](#) is pleased to welcome two new team members, Devon Malling, Assistant TDM Planner, and Andrew Neely, Engagement Coordinator. These positions were created to better support our organization's evolving service needs and enhance our ability to connect with communities, employers, and commuters. We're excited to have Devon and Andrew on board and look forward to the contributions they'll make to our team.

We're Hiring!

Commuting Solution is excited to announce that we are hiring for two positions: a full-time [Marketing Communications Specialist](#).

We're looking for passionate, motivated individuals to help advance sustainable transportation solutions across the northwest metro region.

Subject: Plea to Reconsider Experimental Traffic Pattern on Polk/Dahlia
Date: Thursday, July 30, 2026 12:21:11 PM

[EXTERNAL EMAIL] From outside of City of Louisville DO NOT CLICK links or attachments unless you validate the sender and know the content is safe.

Dear Councilmembers,

I'm a Louisville Ward 3 resident and live on South Washington Avenue between Dahlia and Mulberry. I'm writing (in my personal capacity) to formally register for the public record an ongoing objection to and concerns about the dangerous experimental traffic pattern that the city installed on Polk and Dahlia Streets between Cherry and Pine. Although I understand from Councilmember Hoefner that the current plan is to restripe the same or similar pattern with few changes after the Polk/Dahlia repaving is complete, **I urge the Council and the city staff to take advantage of the repaving project to reconsider the wisdom of the experiment and explore other methods to address the legitimate concerns about traffic on Polk/Dahlia.** While I support innovative and thoughtful approaches to traffic safety for all users of this critical artery in our neighborhood, continuing the experiment threatens the safety of my family, neighbors, and friends. Working together, I think we can do better.

While the experiment has sparked great theoretical debate, my concern is motivated by the practical (and scary) experience of being run off the road by other drivers driving down the center lane without changing course, even after conspicuously alerting them to my presence by laying on the horn. Indeed, drivers fully occupying the center lane instead of straddling the bike lane has become commonplace on Polk/Dahlia, even when (as is often the case) no bicycles are present and despite the City's [education efforts to the contrary](#).

Confusion and divergent expectations about behavior in a shared roadway is not just self-evidently dangerous. It was the root cause of one of the serious accidents—the striking of a pedestrian at a crosswalk by a car that had stopped and then accelerated after the pedestrian entered the crosswalk—that led to neighborhood concern about traffic safety and motivated this experiment in the first place. Unfortunately, the reasons for the driver confusion that we routinely experience and witness are manifold, certain to recur, and effectively impossible to overcome without at least significant changes to the experiment:

- **No pre-pattern signage.** There is no signage to prepare drivers for the unorthodox traffic pattern *before they enter it*. Those entering from Cherry do not encounter a sign for more than a block (past Princeton Court); those entering from Century or Madison are likely to miss the signs located right next to each intersection in either direction while they navigate the turn; and those entering from Pine will not encounter a sign until after Mulberry (or not at all if they turn onto Mulberry).
- **Pre-signage center lane nudges.** In the absence of explicit guidance, other pre-signage parts of the traffic pattern imply that drivers *should occupy the center lane*. Specifically, the crosswalk bumpers at the multi-use path between Owl and Mulberry (which a driver entering from Pine necessarily will encounter before any signage) and at Dahlia Ct. (which a driver

entering from Century likely will encounter before any signage) incur into the bike lane. The bumpers *physically prevent* even those drivers predisposed to occupy the bike line from straddling the lane completely, and reinforce the expectation of other drivers that they should drive in the center lane (and sow confusion when they encounter those who don't).

- **Misleading signage.** If drivers eventually encounter signage, the signs' content at best confuses and at worst further reinforces that they should drive in the center lane. The signs' diagram in part implies that cars should straddle the dashed line and *pass* bicycles. But it simultaneously contradicts that implication by instructing drivers to "yield" to bicycles. "Yield" is a meaningless directive if a car is meant to straddle the bike lane; when a driver encounters a cyclist traveling the same direction in the bike lane, the car and bicycle sequentially occupy the bike lane and there's no "yielding" to be done. Yielding, under the common meaning of the term, can only occur with these markings if a car is driving by default in the center lane and must wait for a bike to go by—i.e., "yield" to it—before entering the bike lane to pass an oncoming vehicle. Again, this implies that cars should occupy the center lane.

- **Routine out-of-neighborhood traffic.** Even if those who live in the neighborhood ultimately learn the pattern (which, anecdotally, is not the case), Polk/Dahlia is and will continue be traversed by drivers who have never been in the neighborhood and necessarily will be encountering the pattern for the first time, including delivery drivers, construction and service vehicles, visitors, and people passing through. (For example, the street is frequently suggested by smartphone map applications as a preferred route to travel from the US-36/McCaslin corridor to downtown Louisville.) Beyond neighborhood signage, the city has no realistic way to educate the drivers who do not live here but will inevitably drive through about the pattern's idiosyncratic expectations.

- **Contradicting the one-lane driving norm set of other ABL experiments.** Moreover, out-of-neighborhood drivers who have encountered other *actual* advisory bike lanes anywhere else in Colorado (and beyond) likely *have learned to drive in the center lane*, because that is the norm for ABL experiments. More specifically, the Dahlia/Polk experiment has repeatedly been [premised](#) on the Boulder and Ft. Collins experiments, but both those (and others I found on a quick search—e.g., [DC](#) (§ 1-2-7), [Minneapolis](#), etc.) explicitly contemplate, in signage and education (e.g., Ft. Collins' [YouTube video](#)), *one center lane* for vehicle traffic that drivers going both directions must occupy by default. Drivers familiar with this usual pattern are understandably likely to be confused and behave erratically when they encounter Louisville drivers continuously straddling the ABL. Conversely, Louisville drivers educated to treat ABLs as a quasi-two-lane road by the Polk/Dahlia experiment now pose a danger to themselves and others if they unlawfully straddle ABLs in other cities.

- **Contradicting federal guidance.** One reason that a single center lane for vehicles is the norm for ABL experiments is that the federal agency charged with approving these experiments explicitly counsels it. See, for example, late-2016 [FHWA guidance](#) suggesting *different paving materials* for the center and bike lines to ensure that drivers *do not straddle the advisory striping*.

- **One-lane driving safety.** Another reason for the single-center-lane norm is that it is objectively safer for drivers and cyclists alike. It (a) unambiguously segregates vehicles and bikes into their own dedicated lanes to set clear expectations where everyone must travel by default, (b) makes vehicle vs. vehicle conflicts visually obvious to both drivers far in advance,

and (c) clearly makes opposing drivers responsible for avoiding cyclists in a conflict, even if they must slow down or stop to wait for bike traffic to clear. In a typical ABL pattern, a driver never “passes” a cyclist in the ABL by swerving around them; a driver *overtakes* a cyclist when they are *both in their own lanes* and there’s no oncoming traffic in the center vehicle lane to impede the driver from progressing. Critically, the driver must always yield to the cyclist and avoid disrupting the cyclist’s normal progression or space in the ABL when passing an oncoming vehicle.

- **Louisville’s inversion of the ABL concept.** By contrast, the Louisville implementation fundamentally misunderstands the basic advisory bike lane concept and its intended utility. Allowing cars to straddle the bike lane obscures impending vehicle vs. vehicle conflicts by situating drivers by default in non-conflicting lanes, revealing the conflict only at the last minute when a driver tries to pass a cyclist. This approach not only minimizes the time to negotiate vehicle vs. vehicle conflicts, but even encourages drivers to *increase their speeds* at the last moment before a conflict to pass cyclists. This creates yet another risk, even for drivers familiar with Louisville’s rules, that ironically illustrated by the sign on [Louisville’s flyer](#)—that two cars traveling in opposite directions may simultaneously try to pass bicycles in each advisory lane via the shared center lane and crash into each other (and potentially cyclists caught in the ensuing chaos).

- **Polk/Dahlia traffic.** Unfortunately, turning Polk/Dahlia into a true ABL experiment with a single lane for vehicles would be untenable given the high volume and speeds of traffic. Volume is particularly high during school dropoff and pickup at Fireside, where signage already prohibits drivers from even turning left onto Dahlia out of the Fireside parking lot because navigating the attendant conflicts unreasonably endangers kids walking to and from school. Conversely, the entire premise of the project was to reduce high speeds on Dahlia/Polk, which means that at other times of day drivers are likely to be speeding down the center lane. Conversely, an ABL isn’t necessary to handle a high volume of bicycle traffic, as other ABL experiments like Boulder’s must, because extensive multi-use, bike-safe paths open to bikes already cross-cross the open space surrounding the Polk/Dahlia corridor.

- **Federal approval.** I am not an expert in transportation law, but common sense suggests that these issues should have been revealed via adequate process and sorted out in advance of deployment. Recent projects (e.g., [Portland, DC](#), and [Ft. Collins](#)) have consistently filed FHWA Requests for Experimentation, received approval, and documented and reported the results to the public and the federal government. While I hope to be wrong about this, I can’t find any obvious evidence that Louisville even submitted an FHWA request. At least as of 2019, [FHWA guidance explicitly treated advisory lanes as experimental](#), specifically over concerns about the pattern’s lack of intuitiveness (p. 18), and required a request for experiment under the MUTCD (which still, as far as I understand, doesn’t address or endorse ABLs). Conversely, it appears that Louisville’s peers have successfully navigated this process in the relevant time period; the FHWA approved an [experimental request for an ABL project in Idaho in late 2023](#), just a month before the Council approved the Louisville experiment, and the Portland experiment, approved in 2022, wrapped up in August 2025 with [an extensive public report to the FHWA](#).

- **Inadequate data.** A critical reason for FHWA approval is to ensure data-gathering and transparency. Of course, the City should be cautious about overrelying on data to reject the qualitative experience of residents. This is an inherently low-occurrence, high-consequence risk, so overreliance on data also risks base rate fallacies, and controlling for the many

variables that affect traffic flow across different times of day and different seasons is challenging.

Regardless, the experiment seemingly has not lived up even to the City's own self-imposed standards for data analysis. The city's [webpage](#) cites "comprehensive traffic studies" and claims that data would be collected quarterly over the first year and thereafter every six months. But the single "[traffic data summary](#)" linked on the page doesn't reflect any data collection after March 2024. Moreover, to whatever extent the city is purporting to continue the experiment on the basis of this data, it doesn't seem to support the claims on the webpage. (For example, though speeds decreased at Dahlia north of Chestnut and Polk south of Hackberry, they *increased* after the installation of the lanes at Polk north of Mulberry and were the same at Dahlia west of Aspen, relative to the pre-installation numbers.) Perhaps there is more recent and comprehensive data, but the city has not made it publicly available—and should do so if it exists.

In closing: I (and many of my neighbors) are grateful to Councilmembers and the city staff for the many tireless, good-faith efforts that each of you have made to make our roads safer (among the many other issues that the city must confront). But I also urge you to take these concerns seriously and reconsider the wisdom staying the course of the Polk-Dahlia experiment. I (and no doubt many of my neighbors) stand ready to work with you on alternative paths forward.

Thank you for your consideration.

-Blake Reid
